

IN THE UNITED STATES DISTRICT COURT
FOR THE MIDDLE DISTRICT OF PENNSYLVANIA

Thomas Sloane, Individually :
and on behalf of all persons :
similarly situated :
vs : 4:16-CV-1571
Gulf Interstate Field :
Service, Inc. :

BEFORE HONORABLE MATTHEW W. BRANN
PLACE: Williamsport, Pennsylvania
PROCEEDINGS: Oral Argument
DATE: Monday, November 21, 2016

APPEARANCES:

For the Plaintiff: James A. Jones, Esquire
BRUCKNER BURCH PLLC
8 Greenway Plaza
Suite 1500
Houston, TX 77081

Alexandra Koropey Piazza, Esquire
BERGER & MONTAGUE, PC
1622 Locust Street
Philadelphia, PA 19103

For the Defendant: Annette A. Idalski, Esquire
Peter N. Hall, Esquire
CHAMBERLAIN HRDLICKA
191 Peachtree Street NE, 46th Floor
Atlanta, GA 30303

1 APPEARANCES: (Continued)

2 For the Defendant: Veronica Turner Saltz
3 CHAMBERLAIN HRDLICKA
4 300 Conshohocken State Road
5 Suite 570
6 West Conshohocken, PA 19428

1 (10:04 a.m., convene.)

2 THE COURT: All right. We have a matter set for oral
3 argument today in the matter of Thomas Sloane, individually and
4 on behalf of all persons similarly situated, against Gulf
5 Interstate Field Services, Incorporated, docketed before this
6 court to 4:16-CV-1571.

7 My staff advises me that on behalf of Thomas Sloane we
8 have presenting argument James Jones from Houston, Texas as
9 well as Alexandra Piazza from Philadelphia.

10 Is that correct?

11 MR. JONES: Yes, Your Honor.

12 MS. PIAZZA: Yes, Your Honor.

13 THE COURT: And from Gulf Interstate, Annette Idalski
14 and Peter Hall from Atlanta, and Veronica Saltz, who I know,
15 from Philadelphia; West Conshohocken, I guess to be precise.
16 These are plaintiff's motions.

17 Who is going to present on behalf -- I assume you are,
18 Mr. Jones. Am I right about that?

19 MR. JONES: Yes, Your Honor.

20 THE COURT: If you would like to come up to the podium
21 and I have some questions for you. If you don't mind, I may
22 intersperse your argument with the questions.

23 MR. JONES: That's fine.

24 THE COURT: Or maybe you both wanted to present power
25 points. Is that right?

1 MR. JONES: Can I do it from here, Your Honor?

2 THE COURT: I'm sorry. Yes. That's right. You
3 wanted to do a power point. You can do that.

4 MR. JONES: Since we're arguing two motions today, how
5 would you like to proceed with that? Would you like to have
6 everybody address one and then have everybody address the
7 other?

8 THE COURT: Well, I think you've got the conditional
9 certification question; you've got the Rule 23 certification.

10 MR. JONES: Correct.

11 THE COURT: The way I have it lined up in terms of my
12 questions, I would be presenting the conditional certification
13 question first, followed by the Rule 23 certification.

14 MR. JONES: That's the way I've got mine set out.

15 THE COURT: Good.

16 MR. JONES: Your Honor, this case is -- the primary
17 issue in this case is whether or not the pipeline inspectors
18 are paid on a salary basis. As I'm sure the Court is aware,
19 for any employee exempt from the overtime provisions of the
20 FLSA, they must be paid on a salary basis. Typically we are
21 talking about a salary basis. We would be talking about 29,
22 Section 541.602, which is the general salary statute. But
23 because of the compensation was paid on a daily basis, you've
24 got to go through 541.604(b) first before you get to 541.602.

25 The defendants in this case have raised a red herring

1 on whether this is a day rate case or an exception case. It's
2 really tomato/tomato {Emphasizing pronunciation}. What it all
3 comes down to is whether they were paid on a salary basis.
4 Without salary basis, there can't be about exemption.

5 As I said before, we have to go to 541.604(b) first,
6 because that's the regulation that says if you are paying
7 compensation on a daily basis, you can do that, and it would be
8 a salary basis if, first -- in the first instance you have a
9 minimum guarantee. And the -- so if you are paying
10 compensation on a day rate basis, you can't get to the salary
11 question, 451.602, without first going through 541.604(b). In
12 other words, you can't get to the salary without a guarantee.
13 And without a guarantee, there is no salary.

14 Case law and the DOL have made that clear for many,
15 many years. In fact, the opinion letter from 1940 is only
16 three years after the FLSA was first adopted and that has been
17 the DOL's persistent condition in the 70 years since. Without
18 a salary, you can't have an administration exemption, you can't
19 have an executive exemption, and you can't have a
20 highly-compensated exemption.

21 So the first question we have to address here is did
22 Gulf Interstate pay its pipeline inspectors compensation based
23 on a daily basis. Unquestionably, they did. In one of her
24 depositions in this case, Catherine Kramer, who is the field
25 manager for Gulf Interstate and is the head of the payroll

1 department, I asked her, I said -- I said that the pay letters
2 say X amount per day, that they have that language in them,
3 that would include every pipeline inspector on every project,
4 other than the two where they were paid hourly. Correct? She
5 said, they state that, just like these do, yes.

6 And then in another part of her deposition she said
7 that the pipeline inspectors are paid on a day rate. So if you
8 are looking at their paystubs or their time sheets, ten years
9 equals a day, and then they are paid the number of days per
10 week that they're guaranteed.

11 So clearly, their compensation is paid in the first
12 instance on a daily basis. If that's true, then you can't get
13 to the salary without there being a guarantee.

14 So the next issue is prior to spring and summer 2014,
15 did Gulf Interstate guarantee pipeline inspectors payment for a
16 minimum number of days per work week. And that is the primary
17 issue in this case. And it is the issue which makes all of
18 Gulf Interstate's pipeline inspectors nationwide similarly
19 situated.

20 THE COURT: I have a question at this point.

21 MR. JONES: Sure.

22 THE COURT: I understand there's a lot of back and
23 forth on the day rate based on the salary issue, what was
24 written in the engagement letters. Whether those letters were
25 remedial measures, whether the workers had to be paid on-site

1 or not. I have looked at all of the submissions.

2 But if we cut to the chase with this, it seems to me
3 the question is did your client, Mr. Sloane, ever take a day
4 off from work, or more precisely, was there ever a day when
5 Mr. Sloane was not on-site?

6 MR. JONES: First, Your Honor, let me challenge the
7 assumption because --

8 THE COURT: Well, don't do that. How about answering
9 the question? Because it seems to me if the answer is yes, if
10 the answer to my question is yes, you've got a problem going
11 forward. Because as far as I can tell, your client was paid on
12 a salary basis.

13 Don't you agree?

14 MR. JONES: I do not agree. Let's go back and answer
15 the question. Did your client take a day off from work or was
16 there, more precisely, ever a day when Mr. Sloane was not
17 on-site site? Yes, there were days when he was not on-site.
18 He worked on a project that had a seven-day schedule. So
19 typically they worked seven days. There were weeks in which
20 they worked only six days. They worked Sunday through Friday
21 and he would have Friday off (indicating air quotes) in the
22 sense that he wasn't out in the field working.

23 But on those days that he was supposedly (indicating
24 air quotes) what they would call off, he was actually working,
25 because on the days that he wasn't out in the field, he still

1 had paperwork that he had to catch up on, which Gulf Interstate
2 expected him to catch up on. So that he actually worked on
3 those days. So that under a day rate plan, if he worked even
4 just 30 minutes, he is entitled to the compensation for the
5 entire day.

6 So -- and even if, let's say, that for a holiday or a
7 sick day that he didn't work, if they, nonetheless, paid him
8 for those days, that does not mean that they paid him a salary,
9 because it's just as consistent with that being a salary basis
10 that they are paying him on a day rate basis.

11 The reason is a company is free to pay its nonexempt
12 employees for sick days, and it's free to pay its nonexempt
13 employees for holidays. At my firm we do both. But that
14 doesn't mean that that's a salary. Just because we pay our
15 receptionist for sick days and for holidays doesn't turn her
16 into an exempt employee. It doesn't turn her into a salary
17 basis.

18 Now the opposite, if the opposite were true, if they
19 didn't pay for sick days, so they didn't pay him for holidays,
20 then that would void the salary basis. But the converse
21 isn't necessarily true.

22 THE COURT: Well, it sound like he makes a salary and
23 gets paid the same even while working off site. I mean, he's
24 paid a salary -- he receives the same salary even if he's
25 off-site. Don't you agree with that?

1 MR. JONES: Certainly. I mean, if he's on salary,
2 he's going to get paid for that day anyway. But the fact that
3 he works on that day, that he's filling out paperwork on that
4 day, that he is filling out reports that he is doing as-builts,
5 it's just as consistent that he's on a day rate because he's
6 getting paid for that day on a --

7 THE COURT: Be that as it may, though, he's being paid
8 a salary.

9 MR. JONES: No, Your Honor. Because he -- because he
10 didn't have the guarantee in the first instance, which is
11 required by 541.604(b).

12 THE COURT: I got that. But it sounds like -- it
13 sounds like he wasn't on-site when he was filling out that
14 paperwork.

15 MR. JONES: He was not on-site. But he is still doing
16 work for the employer. He doesn't have to be on-site to be
17 paid. I mean, if he's at --

18 THE COURT: Then it's --

19 MR. JONES: If he's in his trailer --

20 THE COURT: Then it's some sort of guarantee then from
21 Gulf Interstate, isn't it? It's a guarantee unless he wouldn't
22 get paid. It must be a guarantee for him or he wouldn't be
23 paid for an off-site day.

24 MR. JONES: No, Your Honor. If he's paid on a day
25 rate, okay, if he's paid on a day rate, he is entitled to his

1 full day's pay for every day that he works. There's no
2 limitation on the definition of work, that that be on-site. If
3 he's working at -- I mean, you realize these people are in
4 remote locations.

5 THE COURT: Yes.

6 MR. JONES: If he's in his trailer doing as-builts,
7 doing time sheets, doing reports, he's still working under the
8 definitions of the FLSA, and he is, therefore, entitled under a
9 day rate to be paid for that day. I mean, there are plenty of
10 cases out there that say things like anyone can be -- even an
11 hourly employee can be made to look like he's paid a salary if
12 he works 40 hours every week.

13 The fact that it looks like a salary doesn't make it a
14 salary.

15 THE COURT: So he's entitled to be paid even when
16 off-site?

17 MR. JONES: Under the day rate system, yes.

18 THE COURT: So he's entitled to be paid whether he's
19 on-site or off-site?

20 MR. JONES: Correct. If he is working for -- doing
21 work for the employer.

22 THE COURT: And you described that as a day rate
23 whether he's on-site or off-site?

24 MR. JONES: Correct.

25 THE COURT: But it's no guarantee that he's going to

1 be paid by Gulf Interstate?

2 MR. JONES: That's the point. That's the issue. And
3 that's what 604(b) requires. It requires a guarantee in the
4 first instance, before you can get to the salary question.

5 Without the guarantee and -- let's see if I can --
6 okay. If you look at the bottom opinion letter here. Let's
7 go, first of all, to the last middle one there. The
8 distinction between payment on a salary and payment on a daily
9 basis is that the employee paid on a salary basis is guaranteed
10 a minimum amount.

11 And if you look at the second one, which was, what, 13
12 years ago, payment on a daily basis without an operative salary
13 guarantee does not qualify as salary basis of payment within
14 the meaning of the regulations. And they were specifically
15 talking about 604(b) in that instance.

16 You know, it's like the hourly employee who works 40
17 hours every week. They are not paid a salary unless there's a
18 guarantee. There has to be a guarantee in the first instance.

19 THE COURT: Let me ask you this. At one point in your
20 client's deposition, he says this; he's responding to a
21 question, he says, "New York City that evening, because I
22 remember we saw fireworks and then -- or did I -- I think
23 I worked, yeah. We saw fireworks in New York City. So I was
24 off Saturday" -- meaning July 5th -- "and then I go back on
25 Sunday to the job site."

1 MR. JONES: Right. And that gets back to what I was
2 talking about, about holidays and sick days, if you are paid
3 for those, those are just as consistent with a salary as they
4 are with a day rate or any other sort of non-exempt pay plan.
5 Because the employer is free to pay for those holidays even to
6 its non-exempt employees.

7 The fact that they do pay for those holidays to
8 non-exempt employees doesn't convert those employees to exempt.
9 It doesn't make it a salary. Unless, again, going back, there
10 has to be a guarantee, in the first instance, when you are
11 computing compensation based on a daily basis.

12 THE COURT: Well, it seems to me you are saying then,
13 Mr. Jones, that Mr. Sloane never took a day off. Every day he
14 was away from the job site, he was working for Gulf Interstate
15 and for the same amount of hours as his on-site-site
16 ten-hour-a-day job.

17 MR. JONES: No. He got paid for ten hours a day. He
18 didn't -- there is testimony in this record, in Mr. Sprick's
19 deposition and Ms. Kramer's deposition, that that ten hours
20 doesn't represent the number of hours they worked each day.
21 But that's how they -- because their payroll system is set up
22 on an hourly basis, and if you are paid a day rate of, say,
23 \$360 a day and your payroll system is set up on an hourly
24 basis, then what you've got to do for that employee is you've
25 got to break down his or her day rate into an hourly rate and

1 you've to got to be consistent with the number of hours that
2 you put in.

3 THE COURT: So you are saying --

4 MR. JONES: In other words, they put in ten hours so
5 that his day rate of \$360 would be paid that day. So on the
6 days where he was off-site working, and he may have been
7 working 30 minutes, he may have been working an hour, he may
8 have been working two hours, he was still entitled, under the
9 day rate, to his full day's pay. If his day rate was 360, then
10 they had to enter ten hours there for their system to pay him
11 his day rate for that day.

12 THE COURT: So it was a bulk payment made to Sloane
13 divided evenly among the number of days worked?

14 MR. JONES: He was paid for the days that he worked,
15 and apparently every now and then, he was paid for a sick day
16 or a holiday.

17 THE COURT: As a bulk payment?

18 MR. JONES: As a bulk payment?

19 THE COURT: Was he paid a bulk payment, then divided
20 up by the number of days worked?

21 MR. JONES: No. No. No. No. If you look at the
22 time sheets for each day that he got paid, there is ten hours.
23 Okay. And then you look at some of the other time sheets, so
24 the other opt-ins, where they were -- maybe they left for
25 several days for -- you know, for personal reasons, you know,

1 to go take care of a family member who is ill or something.
2 You know, there would be zero in those days.

3 And again, not being paid for those days is consistent
4 both with a day rate and a salary. Okay. Because a day rate
5 you paid for the days that you worked. A salary, you can be
6 deducted for absence for personal reasons.

7 But the way their pay was calculated was based on the
8 time sheets and they were paid their day rate for each day that
9 they worked or were otherwise paid for or because they were
10 sick or for a company holiday.

11 THE COURT: It sounds to me that Mr. Sloane is paid a
12 salary spread evenly among the weeks that he was employed. And
13 the chart that Ms. Idalski, I'm assuming, or her colleagues,
14 put together in her briefs shows me that, doesn't it?

15 MR. JONES: It shows me what he was paid. But we are
16 back to the hourly employee who can look like he's got a salary
17 if he works 40 hours every week.

18 THE COURT: But isn't a salary spread evenly amongst
19 those weeks worked? Isn't that what the chart says?

20 MR. JONES: A salary can be paid -- a salary, at least
21 on the FLSA, is on a workweek basis. You are paid X amount per
22 week. Now, if you look at some of those charts you'll see
23 differences between. It's not all the same. And again, just
24 because it equals out, every paycheck is for an identical
25 amount -- I mean, when you are working a seven day schedule,

1 and if you get paid for all seven of those days, for whatever
2 reason, whether you're paid on a day rate and you work all
3 those days or you're paid a day rate and you're also paid for
4 your sick days and your holidays, so that you get paid for all
5 seven of those days, it's going to equal out to the same. It's
6 going to equal out to the same amount. But that same amount
7 doesn't mean that that's necessarily a salary.

8 THE COURT: Well, let me -- hold on, Mr. Jones. Let
9 me ask you this question.

10 If he's on-site inspecting gaskets for 11 hours one
11 day and the next day he's down in New York City on
12 July 4th watching fireworks for a half an hour, he's paid the
13 same.

14 MR. JONES: And that's the way a day rate works.

15 THE COURT: Or the way a salary works.

16 MR. JONES: It's also the way a salary works. And I
17 don't disagree that that's the way a salary works. But it's
18 also consistent -- but that doesn't mean it is a salary.
19 Simply because it looks like a salary doesn't mean it is a
20 salary because it's equally consistent with being paid on a day
21 rate basis.

22 Now, how do you tell the difference? That's what
23 604(b) tells us. That's what these DOL opinion letters tell
24 you. You tell the difference by whether there is a guarantee.

25 THE COURT: Well, I mean, I'm looking at,

1 electronically, his pay period running from August 12th --
2 excuse me, I misspoke -- April 12th, 2014 through that first
3 pay period -- through October 11 of 2014, which ended
4 October 24th, 2014.

5 MR. JONES: Right.

6 THE COURT: And it looks like it's all the same.
7 Identical. And for every period it's the same. It's \$5,404.

8 MR. JONES: For a two week period.

9 THE COURT: Right. The last week is prorated for
10 whatever reason. So the last week he's paid less.

11 MR. JONES: Right.

12 THE COURT: It's an identical amount.

13 MR. JONES: Exactly.

14 THE COURT: So that includes the pay period of early
15 July of 2014 when he's down in New York City, by his own
16 admission, watching fireworks.

17 MR. JONES: Right. But that was a holiday. That was
18 the day everybody was off for the July 4th holiday. And again,
19 the fact that they chose to pay everyone, including their day
20 rate employees, for that holiday is not inconsistent with a day
21 rate.

22 THE COURT: Could you bring back that language you
23 showed me earlier? It was a couple of screens prior -- no.
24 No.

25 MR. JONES: Am I going back too far? Is that it?

1 THE COURT: Yes. That's what I want to see.

2 Go ahead. Thank you.

3 MR. JONES: All right. So I think I left off at this
4 issue of whether or not Gulf Interstate guaranteed the pipeline
5 inspectors for a minimum number of days per week is the first
6 issue upon which the plaintiff and the class are similarly
7 situated.

8 Now, factually, here is what we know about that.
9 Okay. Prior to the spring/summer of 2014 when they went back
10 and said well, we're going to put out these letters that do say
11 guarantee. Prior to then, every pay letter to every pipeline
12 inspector on every project stated compensation as an amount per
13 day.

14 We know that prior to spring and summer of 2014 there
15 are absolutely no documents referencing a guarantee. Not a
16 single one. Let me repeat that. There are absolutely, prior
17 to that time, no documents, not a single one, referencing a
18 guarantee.

19 We know that prior to April 2014, not a single pay
20 letter specifically used the word guarantee or specifically
21 guaranteed a minimum number of days of pay, which is what
22 604(b) requires.

23 Now instead, Gulf Interstate claims that prior to the
24 spring and summer of 2014, all the guarantees were communicated
25 verbally and that all of the internal communications between

1 Mr. Sprick and Ms. Kramer, who supposedly were the ones who
2 determined what the guarantee was for everybody on every
3 project everywhere, were all verbal and nothing, nothing,
4 nothing was ever written down. And that all of the
5 communications between Ms. Kramer in the payroll department
6 telling them what the minimum guarantee was were all verbal and
7 that nothing, nothing, nothing was ever written down.

8 Now, these last two points are really interesting,
9 Judge --

10 THE COURT: Does it need, Mr. Jones, to it be written
11 down?

12 MR. JONES: Absolutely.

13 THE COURT: Is there a regulation to that effect?

14 MR. JONES: There's case law to that effect.

15 THE COURT: What is it?

16 MR. JONES: I don't have it -- I'm bad about pulling
17 names of cases off the top of my head, but it's in our
18 briefing, if you can find that.

19 THE COURT: Ms. Piazza, if you can find the case, just
20 flag me.

21 MS. PIAZZA: Will do.

22 THE COURT: Thank you.

23 MR. JONES: But those last two points are very
24 interesting.

25 THE COURT: What if someone receives a salary and it's

1 never written down, under this scenario?

2 MR. JONES: Well, okay. But we're talking about this
3 specific scenario. Okay. Now, if I receive a salary and it's
4 never written, there is no requirement that it need to be,
5 because my compensation is not calculated on a daily basis. So
6 you have to realize what we're talking about here is a very
7 specific scenario.

8 When your compensation is paid on a daily basis, if
9 you want to convert that to a salary, you have to have a
10 guarantee in the first instance. But -- and I don't know if --
11 Your Honor, have you ever read Louis Nizer's book, *My Day (sic)*
12 *in Court*?

13 THE COURT: A long time ago.

14 MR. JONES: Well, the prologue to that book is called,
15 *Behind the Green Door*. And every trial lawyer I have ever
16 trained, it's one of the first things I've required them to
17 read is that prologue, *Behind the Green Door*, because it talks
18 about this very, very simple idea that if X is true, then what
19 else must also be true. Okay.

20 So the idea that here's a company that supposedly
21 knows that to convert a daily payment into a salary it needs to
22 have a guarantee, it never writes it down. It doesn't write it
23 down in its communications to the employees in their pay
24 letters. It doesn't say a word about a guarantee. And nowhere
25 in its internal communications is there anything that ever

1 references a guarantee.

2 And one of the things that we thought of when we were
3 thinking, okay, if there was a guarantee, then what else needs
4 to be true? One of those things was well, someone has got to
5 tell their payroll clerk, when they are inputting all this
6 stuff, that these people have a guarantee of X number of days.

7 Now, the guarantee isn't the same number of days for
8 every project. So they have to know for this project, it's
9 seven days; for this project, it's six days; for this project,
10 it's five days. And so if there is a guarantee, what else you
11 would expect to be true is that there will be something in
12 writing to these payroll clerks telling them on this project
13 it's seven days, on this project it's six days, on this project
14 it's five days.

15 And Judge Fischer apparently thought that made some
16 sense because she ordered the defendants to produce any
17 documents like that to us or explain why they don't exist.

18 And what we got was the declaration of Catherine
19 Kramer, again, the head of the payroll department, who said
20 that she and Mr. Sprick together determined what the guarantee
21 was going to be for each project. But that every single
22 communication ever, within the last ten years, about that was
23 verbal and nothing, nothing, nothing was written down. There
24 was never an e-mail. There was never a note made. We know
25 that, because if there was, they would have had to produce that

1 to us.

2 THE COURT: Why does that matter? I mean, in my
3 analysis of the law, I understand the point you are making, but
4 why does that matter?

5 MR. JONES: It matters in that there is a significant
6 issue in this case of whether there's a guarantee in the first
7 instance, as required by 604(b), in this situation where they
8 are computing compensation on a daily basis and they are trying
9 to make it into a salary through a guarantee. There has to be
10 a guarantee.

11 And yet, everything -- in the communications between
12 Ms. Kramer and the payroll clerks, according to her, were all
13 verbal. Never an e-mail. Never a note. Never a memo. And
14 nothing was ever written down. The payroll clerk didn't even
15 write it down for their own records to be able to keep up with
16 it, because we know they didn't, because if they had, they
17 would have had to produce that document.

18 So we're supposed to believe that Ms. Kramer had this
19 didactic memory where she kept in her head the number of days
20 guaranteed for every project, of which there were many. Yet,
21 when, in her deposition, I asked her, can you list for me not
22 even all the projects, all of the clients that you've done --
23 that Gulf Interstate has provided pipeline inspection for, she
24 couldn't. She couldn't come up with more than three or four.

25 But we're supposed to believe that she kept in her

1 head, because she never wrote it down, nobody ever wrote it
2 down, but that she kept in her head the number of guarantee
3 days for every single project Gulf Interstate had.

4 THE COURT: Mr. Jones, if it's not in writing, that
5 doesn't mean that there wasn't a guarantee. And frankly, you
6 know, if I look at the salary schedule that defense counsel has
7 provided me that I have referenced before, and you know it's in
8 their papers, isn't that really more probative? I mean, he's
9 earning exactly the same amount of money over an every two-week
10 period for six months or roughly that.

11 MR. JONES: Okay. He's earning the same amount for
12 six months. The question is not whether he earned the same
13 amount for six months, because as I explained to you earlier,
14 it's just as consistent -- when you are on a seven-day
15 schedule, earning the same amount for a six-month period is
16 just as consistent with a day rate pay system as it is with a
17 salary. What turns that day rate into a salary is the
18 guarantee.

19 And that's why it is so important that there is not a
20 single thing written down, not a piece of paper nowhere that
21 references a guarantee, even where you would expect it clearly
22 to be. And then, as I indicated earlier, there is case law
23 that says that the guarantee required by 604.2(b) has to be in
24 writing, has to be part of the employment arrangement, which is
25 part of the language at 604.2(b).

1 THE COURT: Doesn't Ms. Kramer, not knowing the days,
2 suggest she was using a salary expressed in terms of pay per
3 day multiplied by 14-day increments equalling 5,400 for each
4 pay period?

5 MR. JONES: And that proves what?

6 THE COURT: Well, she does not need to know the days
7 set out that way.

8 MR. JONES: Okay. I'll give you that one. And if
9 every project was seven days, it would be easy. But they are
10 not all seven days. MarkWest in Ohio was -- for a while it was
11 six days and then it turned to five days.

12 And there is testimony from both, I believe,
13 Mr. Sprick and Ms. Kramer that some are seven, some are six,
14 some are five.

15 THE COURT: Were all of Mr. Sloane's seven-day periods
16 in that period of time that he worked for Gulf Interstate?

17 MR. JONES: Yes. He was on a seven-day schedule.

18 THE COURT: So they were all seven-day schedules or --

19 MR. JONES: Yes.

20 THE COURT: -- seven-day scheduled periods through his
21 term of employment with them?

22 MR. JONES: Yes.

23 THE COURT: Or through them.

24 MR. JONES: And so a lot of those weeks he worked
25 seven days. So if he's paid on a day rate, he gets paid for

1 seven days. Okay. The only -- you know, now some of those
2 weeks he worked six days in the field, but on that seventh day
3 he was working at home, as he was expected to be by Gulf
4 Interstate, doing this paperwork, including this as-built,
5 which as I understand is just a bear to -- you know, over the
6 time that you are there because you've got to have it completed
7 by the time the project is completed to complete. That's
8 really the only time you have to do it, is on a day that you
9 are not out in the field.

10 And the only other days where he wasn't working in the
11 field and he got paid anyway were sick days and a holiday,
12 which again, is not inconsistent with being paid on a day rate
13 basis.

14 THE COURT: It seems odd to me, though, that Gulf
15 Interstate would pay its workers the same rate per day even if
16 they were to only work ten minutes in one of those days.

17 MR. JONES: If they are paying them a day rate, that's
18 not their choice. That is what a day rate is. In other words,
19 if I'm being paid on a day rate, I work one hour, I get paid my
20 entire day rate.

21 THE COURT: Or it suggests -- it might suggest to an
22 observer that he's being paid a salary.

23 MR. JONES: Again, I do not disagree that it is
24 consistent -- that it is consistent with and looks like a
25 salary. My point is that it is just as consistent as being

1 paid on a day rate basis. And that is why when you are paid on
2 a daily basis, there has to be something else. And that
3 something else is the guarantee.

4 THE COURT: Why would any sophisticated employer -- I
5 would assume for the sake of argument that Gulf Interstate is a
6 sophisticated employer -- use a day rate then? Why would they
7 do that? What am I missing?

8 MR. JONES: In the oil and gas industry, 90 percent of
9 people working out in a field -- in the field are paid on a day
10 rate.

11 I can tell you after doing, you know, probably not
12 hundreds but at least tens, multiple tens, of cases involving
13 companies out in the oil field, I can tell you that with the
14 exception of one that paid them hourly, everybody else was paid
15 on a day rate.

16 THE COURT: That seems a curious way to do business.
17 That's not the business I'm in, obviously. But it seems to me
18 that if they are being paid -- if Mr. Sloane is being paid \$378
19 a day, it looks like that's about what it is, that they would
20 be better off putting him on salary to do that. I mean,
21 wouldn't they do that, get ten minutes of work for \$378 versus
22 ten hours worth of work the next day for \$378. Which is
23 better? I should think it would be ten hours of work for \$378.

24 MR. JONES: Well, again, if -- if -- if you're on a
25 salary and if your salary is the equivalent of seven days times

1 \$378, the fact that you don't work on a Saturday and you work
2 at home for, you know, a half an hour doesn't mean that you get
3 to deduct anything from that salary. I mean, that's the whole
4 idea of 541.602, is it has to be a set amount without reduction
5 for the, you know, amount -- the quantity or quality of the
6 work.

7 THE COURT: Can you deduct from a day rate?

8 MR. JONES: Can you deduct for a day rate?

9 THE COURT: From a date rate.

10 MR. JONES: From a day rate, for not working a full
11 day?

12 THE COURT: Right.

13 MR. JONES: No. No. I mean, let's -- okay. Here's a
14 perfect example out in the field. If you work for four hours
15 and then you're rained out. They just send everybody home.
16 Okay. It's raining too hard. We can't weld out here. We're
17 sending everybody home. So you only worked four hours that
18 day.

19 Under a day rate plan, you get paid for your full day.
20 Under a salary plan, you get paid for your full day. And
21 that's why I keep saying that the fact he got paid for seven
22 days a week during that entire time period is both consistent
23 with -- it's consistent with a salary basis, but it's just as
24 consistent with a day rate basis.

25 THE COURT: What's the difference between a day rate

1 and a salary expressed in days?

2 MR. JONES: A guarantee.

3 THE COURT: Ms. Piazza, were you able to find any case
4 law dealing with --

5 MS. PIAZZA: I think this was the case you were
6 looking for.

7 MR. JONES: The case is Rodgers versus Basin School
8 District Number 72.

9 THE COURT: This is in your papers, I take it?

10 MR. JONES: Yes.

11 THE COURT: Where is it in your papers?

12 MR. JONES: Our Plaintiff's supplemental brief of
13 motion to facilitate notice. It's document 150 in the ECF
14 system. It's on page three at footnote ten, at the bottom of
15 footnote ten. And it's the District of Idaho, December 4,
16 2006. The Court in that case granted summary judgment on the
17 salary basis test because the employment contracts -- this is
18 in quotes here. "The employment contracts in this case do not
19 express any guarantee of payment of a required weekly salary."
20 And that case specifically dealt with the 541.604(b) case.

21 So because the employment arrangements, the
22 employment -- the contracts didn't express it, okay, he granted
23 summary judgment for the plaintiffs, saying there wasn't a
24 salary basis because there wasn't a guarantee that was in
25 writing.

1 THE COURT: So let me go back to my question, before
2 we turn to the discussion of case law. The difference between
3 a day rate and a salary expressed in days. So if Mr. Sloane
4 works and is paid a thousand dollars for every ten days that he
5 works, is that a salary or is that a day rate?

6 MR. JONES: It depends on whether there is a
7 guarantee. So in addition to there not being a single document
8 anywhere, we know that Mr. (sic) Kramer and Ms. (sic) Sprick
9 determined the number of days that the pipeline inspector would
10 be guaranteed for all pipeline inspectors. We know that in the
11 spring and summer of 2014 Gulf Interstate sent out
12 reclassification letters for its pipeline inspectors where, for
13 the very first time, it put the guarantee in writing. And we
14 know that all pipeline inspectors employed by Gulf Interstate,
15 regardless of their job title, project or geographic location
16 received those reclassification letters.

17 So Gulf Interstate's pipeline inspectors are similarly
18 situated because they are all subject to the same compensation
19 plan. And the issue regarding them, whether or not there was a
20 guarantee in the first instance, is common to all of them.

21 Now, they are also similarly situated to the post
22 spring/summer 2014 time period. That's because in these
23 reclassification letters, Gulf Interstate still didn't get it
24 right. Okay. In these post spring/summer reclassification
25 letters, Gulf Interstate states that you will be paid your

1 guaranteed salary for the work week if you are at the job site
2 and ready and willing to work.

3 The regs only require that you be ready and willing to
4 work, in 541.602(a). And the job site is the job trailer at
5 the job site. So that the pipeline inspector has to travel
6 from wherever his temporary quarters are to the job trailer on
7 any day and able to be paid under the supposed guarantee for
8 that day.

9 And that's adding another condition on receiving your
10 pay under a salary that destroys both the guarantee and
11 destroys the salary -- any salary basis that it is meant to
12 create.

13 That is a -- that's actually -- they are similarly
14 situated as of that because everybody got that letter that says
15 that. And that's basically a question of law that the Court
16 can determine, whether or not the addition of that additional
17 condition destroys the guarantee and/or salary basis.

18 Now, the second issue under which the pipeline
19 inspectors are similarly situated is the issue of job duties.
20 If Gulf Interstate can prove that there was a guarantee and
21 thus, they meet the salary basis test, they still have to prove
22 that the pipeline inspectors made the duty test for the
23 exemptions.

24 If Gulf Interstate proves that there was a guarantee
25 and, therefore, a salary basis, the executive exemption isn't

1 really going to be an issue because the supervisory inspectors
2 who are within the larger class and who we proposed breaking
3 the larger class down into non-supervisory as supervisory, and
4 for this very reason, if Gulf Interstate proves that these
5 pipeline inspectors were paid on a salary basis, and then you
6 have to look at the job duties test.

7 We admit if they are paid a salary, the supervisory
8 inspectors will meet the requirements of the executive
9 exemption. So it's not -- it sort of -- those people will fall
10 out of the class and the issue of the executive exemption falls
11 out of the class. Or falls out of the case.

12 Now, the administrative exemption, which is the big
13 one here, the administrative exemption can be broken down into
14 two prongs. First what's called the directly-related prong.
15 And that is where the employee's primary duty is the
16 performance of office or non-manual work directly related to
17 the management or general business operations of the employer
18 or the employer's customers. And the second prong is what we
19 call the discretion and independent judgment prong, and that
20 requires that the employee's primary duty includes the exercise
21 of discretion and independent judgment with respect to matters
22 of significance.

23 Now, under the directly-related prong, one way that
24 both the regulations and courts often look at this is what is
25 called the administration production dichotomy. And here is

1 how that works.

2 If someone is clearly a production employee, then they
3 cannot meet the directly related test. Now, the converse isn't
4 true. If simply it was because someone is not a production
5 employee doesn't mean that they are an administrative employee.
6 But if they are clearly a production employee, they cannot meet
7 the directly-related prong of the administrative exemption.

8 The preamble to the 2004 amendments to the regulations
9 put it like this; the administrative exemption is limited to
10 those employees whose primary duty relates to the
11 administrative as distinguished from the production operations
12 of a business.

13 Now, another way that both the regulations and the
14 Court look at this directly related prong is what I call the
15 staff line distinction. Again, in the preamble to the amended
16 2004 regulations, the DOL put it like this; that administrative
17 employees can be described as staff rather than line employees.
18 Again, that was reiterated in a DOL opinion letter back in
19 2010.

20 Here is the way I analogize the staff versus line
21 employees. My mind goes to a Civil War battlefield. The staff
22 employees are the people inside the tent with the map laid out
23 and the pieces moving, making the plans. The line employees
24 are the people outside of the tent, who then the people inside
25 the tent say okay, go implement this plan.

1 Now the pipeline inspectors' status as administrative
2 employees under both of these tools utilized by the regs and
3 courts can be determined for the group as a whole.

4 Now, pipeline inspectors are clearly production
5 employees. They are out in the field literally working on the
6 production of the pipeline. That pipeline is being produced
7 and they are out there day by day doing the production, doing
8 their primary duty which is to observe and to ensure that the
9 construction of the pipeline is being conducted in a way that
10 complies with the specifications and requirements given to them
11 by the pipeline owner. And some of those requirements also
12 come through the law, through regulations of the Department and
13 Energy and the Department of Transportation.

14 This is -- what is happening out in the pipeline
15 construction situation is as close as you can get to a
16 manufacturing production line that isn't in a manufacturing
17 plant. So these people -- these pipeline inspectors are
18 clearly production employees. The pipeline inspectors clearly
19 are not staff employees. They are line employees. They are
20 not the people in the tent making the plans. They are the
21 people out in the field carrying out the plans.

22 So pipeline inspectors are similarly situated
23 regarding whether they meet the directly-related prong of the
24 administrative exemption with regard to their status under the
25 administration production dichotomy and the staff versus line

1 distinction.

2 The next prong that they have to --

3 THE COURT: Let me ask you something.

4 MR. JONES: Sure.

5 THE COURT: I found a decision in 2004 in which the
6 United States Court of Appeals for the Sixth Circuit applied
7 the FLSA's administration exemption to a nuclear power plant
8 technician, whose primary role was ensuring the safety of the
9 system. The case is Schaefer S-C-H-A-E-F-E-R, against Indiana
10 Michigan Power Company found at 358 F.3d, page 394. The Sixth
11 Circuit said this, quote, Although the plaintiff spends some of
12 the time inspecting trucks, examining load bracings, inspecting
13 shipping containers and examining shipping labels, these
14 inspection tasks, even if not performed at his desk, are
15 nonetheless not manual tasks. Schaefer performs manual tasks
16 when he actually picks up a hammer to brace a load or installs
17 or tightens a strap. Accordingly, Schaefer does not spend so
18 much of his time on these manual tasks so as to fall outside
19 the exempt status."

20 So how would you respond to that characterization in
21 light of Mr. Sloane's primary duties?

22 MR. JONES: Sure. Let me back up here. Okay. I have
23 broken the administrative exemption here down into two prongs.
24 Technically it could be broken down into four. And one of the
25 prongs is this performance of office or non-manual work.

1 So in other words, to meet the administrative
2 exemption, you have to be performing office and non-manual
3 work. And that's what Schaefer is addressing. They are
4 addressing that requirement and that requirement alone.

5 And that's not -- while we've made the argument in
6 our brief that the inspection work that these people do is
7 manual labor, that's not what I'm talking about here this
8 morning. What I'm talking about -- what I'm focusing on here
9 this morning is directly -- what is the directly-related prong
10 and the discretion and independent judgment.

11 Shaefer goes to even though the office or non-manual
12 work language is included within the same section as directly
13 related, it's a completely different requirement. It's an
14 independent requirement. And what Shaefer said is what they
15 were doing -- because if you recall this, they said they spent
16 some of their time, okay, doing these things. And what the
17 plaintiff was arguing is the time that they spent doing these
18 things, they were doing manual labor. And the Sixth Circuit
19 says no, they weren't doing manual labor when they were doing
20 that.

21 Conversely, the pipeline inspectors spend all their
22 time out in the field inspecting the construction of the
23 pipeline. So the idea of whether or not, number one, they are
24 doing manual labor or whether or not they are doing enough of
25 it, which was what was raised in Shaefer, really doesn't apply

1 here.

2 THE COURT: So you're saying that Mr. Sloane's work is
3 non-manual, but his inspection of the pipeline system is not
4 related to the general operations of the particular oil field,
5 the gas field?

6 MR. JONES: And this morning -- we can put aside the
7 manual labor part. Let's assume that his work is non-manual,
8 because there is a very specific definition of what constitutes
9 manual work in the regs. So let's assume that he's non-manual.
10 Okay. So let's assume he meets that primary duties are
11 performance of office or non-manual work. Then that's a
12 separate requirement. But that work has to be directly related
13 to the management or general business operations of the
14 employer or employer's customers.

15 And that is where -- that requirement right there,
16 directly related to is where both the regs and the court used
17 the administration production dichotomy and used the staff
18 versus line employee distinction.

19 THE COURT: Well, I suppose it could be said that
20 those distinctions tend to bleed into one another a bit.

21 MR. JONES: Sure, they do. I mean, they are
22 different -- there are different ways -- you mean, the
23 administrative, production and staff and line? They are
24 different ways of saying sort of the same thing.

25 In other words, if you're involved in -- if you're a

1 production employer and you're involved in production; if
2 you're a line employee rather than staff, then you are not --
3 your work is not directly related to the manual or business
4 operations of the employer or their customers.

5 THE COURT: Well, Mr. Jones, if Mr. Sloane is a
6 non-manual worker, as in the Sixth Circuit decision in Shaefer,
7 then, perhaps, that makes it more likely that he was involved
8 with the general business operations of Gulf Interstate.

9 MR. JONES: Not at all, Your Honor. And I don't think
10 you'll ever -- you'll find a single case anywhere that makes
11 that connection.

12 THE COURT: Well, he wasn't --

13 MR. JONES: Everybody --

14 THE COURT: He wasn't laying the pipe, was he?

15 MR. JONES: No, he wasn't.

16 THE COURT: He wasn't installing the pipeline?

17 MR. JONES: No.

18 THE COURT: He was overseeing the effective and safe
19 functioning of the system, as in Shaefer, wasn't he? Shaefer
20 here says, "Shaefer does not spend so much of his time on these
21 manual tasks as to fall outside of exempt status."

22 Isn't that Sloane here?

23 MR. JONES: Absolutely not. Because it's a completely
24 different question. Completely. Simply because you do not --
25 doing non-manual work is not enough. Otherwise, the reg would

1 stop there and say --

2 THE COURT: But didn't you tell me --

3 MR. JONES: -- the primary duty is the performance of
4 office or non-manual work, and it would stop.

5 THE COURT: But you just accepted my argument that
6 these functions bleed into one another or blended together
7 somewhat.

8 MR. JONES: No. What I -- non-manual and the -- maybe
9 I misunderstood what your question was. Because what I said,
10 what bleeds into each other is the administrative production
11 dichotomy and the staff line distinction, that those bleed into
12 each other. But the office or non-manual work doesn't bleed
13 into the -- direct related to the management or business
14 operations.

15 THE COURT: Let's look at it this way, Mr. Jones. The
16 more manual your job is, then it seems to me the less involved
17 you are going to be in general business policy. Wouldn't you
18 agree?

19 MR. JONES: I'm sorry?

20 THE COURT: The more manual your job is, the less
21 involved in general administrative policy you are going to be.

22 MR. JONES: Sure.

23 THE COURT: The more administrative in nature your
24 job, the more you are going to be involved in general
25 operations of the particular unit of the business.

1 MR. JONES: What you just said is like saying the more
2 of a doughnut you are, you're a doughnut. In other words, if
3 you say the more administrative your job, then the more likely
4 you are to be directly related to. That is you have to be
5 directly related to the management and business operations to
6 be administrative. Now, you also have to do office or
7 non-manual work. The office or non-manual work, that's in
8 there because there are several places in the regulations and
9 in the preamble to the 2004 regs where they make clear that a
10 blue collar worker under no circumstances can be exempt.

11 That's why, in the beginning of that, it says you are
12 doing office or non-manual labor. In other words, you're not a
13 blue collar worker, okay, but the work you are doing also has
14 to be directly related to the management or business operations
15 of your employer or your employer's customers.

16 So yeah, to the extent, you know, the more blue collar
17 you are, the less likely you are going to be administratively
18 exempt, sure, because blue collar workers can't be exempt.
19 Period. But simply because you work in an office or do
20 non-manual work, that's not enough by itself.

21 And it doesn't even, like, start the scale tipping for
22 directly related. Directly related, your work has to be
23 directly related to the management or business operations of
24 the employer or the employer's customers. And that's where you
25 get into the administrative dichotomy, because one of the regs

1 clearly says if you do any production work, then you are not
2 administratively exempt. Okay. And that's why they use
3 this -- the distinction between staff and line employees.

4 In other words, administrative employees, people doing
5 work directly related to the management or business operations
6 of the employer, I mean, those are staff people. Those are
7 people in the tent. They are the people on the higher floors
8 of the building. The line employees are people like Mr. Sloane
9 who go out there on the line, literally on the production line,
10 and do their work and carry out the plans that have been
11 developed by the staff employees back in the tent, or back on
12 the top floor.

13 Because he's out there observing, to make sure that
14 what happens or what is happening is consistent with the specs
15 and regulations provided to him. He doesn't decide what they
16 are. They are given to him. And he looks at these and he says
17 yep, it requires it be preheated to 300 degrees. Did you
18 preheat it to 300 degrees. Yep, it requires you do two passes.
19 Did you do two passes. And you look at it after it's done, it
20 can only have so much undercut. Does it have more than that in
21 terms of undercut. Does it have pin holes bigger than, you
22 know, X size.

23 But he's not the one making the determination of
24 whether or not those are the correct specs or not. He's just
25 out there on the line making sure that what is happening

1 complies with those specs. Very different. And we'll get to
2 some regs in just a moment that clearly talk about things like
3 that, making sure that things comply with, you know,
4 specifications and requirements developed by others, you know,
5 doesn't equal directly related and that you are not exercising
6 independent discretion and judgment.

7 Which is the next issue here. And that is -- the next
8 prong is discretion and independent judgment. Now, before we
9 go there, let me sort of make this point. The exemptions are
10 the defenses on which the defendant has the burden of proof.
11 And for them to be able to apply an exemption to an employee,
12 they have to meet each of every one of the requirements of the
13 exemption.

14 So if they fail on the directly-related prong, even if
15 they meet the discretion and independent judgment prong, then
16 the exemption cannot apply. If they meet the discretion and
17 independent judgment prong but fail on the directly-related
18 prong, the exemption cannot apply.

19 This 541.202(e), which is where the regs start talking
20 specifically about the type of work that inspectors do, it
21 says, "The exercise of discretion and independent judgment must
22 be more than the use of skill in applying well-established
23 techniques, procedures and specific standards described in
24 manuals and other sources."

25 Then you go to 541.202(g). "Ordinary inspection work

1 generally does not meet the duties, requirements for the
2 administrative exemption. Inspectors normally perform
3 specialized work along standardized lines involving
4 well-established techniques and procedures which may have been
5 cataloged and described in manuals or other sources. Such
6 inspectors rely on techniques and skills acquired by special
7 training or experience. They have some leeway in the
8 performance of their work but only within closely prescribed
9 limits."

10 That is the regulation for the DOL specifically
11 talking about inspectors.

12 This is a case, Zannikos versus Oil Inspections from
13 the Fifth Circuit last year where they determined that
14 inspectors do not exercise discretion and independent judgment.
15 If you'll see, it says, "We note at the outset that there are
16 striking similarities between the oil inspectors' work and that
17 of inspectors, examiners and graders who are generally
18 non-exempt employees", in referring to the specific regs that
19 talk about those type of employees.

20 This is from the Weiss report. It's a report out of
21 the DOL. The distinction that Weiss makes here is that he says
22 when a supervisor inspects the work of his employees, that's
23 part of his management responsibilities. That's part of his
24 management duties. Okay. He says, "But this kind of examining
25 and checking must be distinguished from the kind which is

1 normally performed by an examiner, checker or inspector, and
2 which is really a production operation rather than a part of
3 the supervisory."

4 So that's DOL saying what inspectors do, is production
5 work.

6 Then in the DOL field operations handbook, which is
7 the handbook used by their investigators, once again, they are
8 saying that ordinary inspection work does not meet the duties
9 requirements for the administrative exemption.

10 Now, Gulf Interstate admits that its pipeline
11 inspectors are similarly situated as to job duties. When we
12 asked them in interrogatories about what exemptions you claim
13 apply, they say that plaintiff and the putative FLSA class
14 members. In other words, the whole group, are exempt pursuant
15 to FLSA's administrative executive, highly compensated and/or
16 compensation exemptions.

17 They say that without regard to the project they are
18 working on, their geographic location, their specific job
19 title, whether they're welding inspector or code inspector or
20 any differences in job duties that they may now claim exist.

21 So that Gulf Interstate's pipeline inspectors are
22 similarly situated with regard to job duties as well as the
23 salary basis test. I think that's -- okay.

24 I'm sure we're going to hear quite a bit from the
25 defendants about Hughes. And there is two ways in which Hughes

1 could relate but doesn't to this case. The first is, the
2 Hughes court did conditionally certify an FLSA Class. But the
3 Hughes court did it limited to the evidence it had before it,
4 which is very different than the evidence that is before this
5 Court.

6 The evidence available in Hughes was the declarations
7 from plaintiffs and three pre-notice opt-ins. All three of
8 those opt-ins worked the same project that the plaintiffs did.
9 And so what the Hughes court did was, because that's the only
10 evidence I have, and I don't have any evidence about outside
11 that project, I'm going to conditionally certify an FLSA class,
12 but I'm going to do it limited to that project.

13 I think it is significant to note that at the time
14 that the motion for notice was filed in that case there had
15 been absolutely no discovery done. So that the only evidence
16 we had to present to the court, to the Hughes court, was the
17 evidence of our plaintiffs and the pre-notice opt-ins.

18 Now, contrast that with the evidence available in this
19 case. In this case we have the plaintiff and five pre-notice
20 opt-ins who worked in nine different states for five different
21 clients. But more importantly, we have evidence from the
22 management of Gulf Interstate itself. We have the deposition
23 testimony and the declarations from Mr. Sprick and Ms. Kramer,
24 establishing that the pay program is uniform throughout Gulf
25 Interstate's organization, except for the two projects where

1 one was in California where they are paid -- where they were
2 paid hourly.

3 And that makes sense being in California, since
4 California is -- their wage and hour laws are so strict. We
5 have available in this case the evidence regarding the
6 reclassification letters. We have evidence regarding the
7 complete lack of documents prior to the spring or summer of
8 2014. A guarantee. We have reference regarding Gulf
9 Interstate's claim that everything regarding any guarantee was
10 verbal. And we have evidence that Ms. Kramer and Mr. Sprick
11 determined the number of days pipeline inspectors would be
12 guaranteed for all projects.

13 That, of course, is their claim. But you know, we
14 have absolutely no documentary evidence.

15 THE COURT: So are you saying, Mr. Jones, that they
16 are paying the same rate --

17 MR. JONES: No.

18 THE COURT: -- every day in every state?

19 MR. JONES: Absolutely not. What I'm saying is that
20 the decision making process is taking place at the highest
21 level of the company in one place. So it's not that this
22 decision making process is disbursed to, you know, all of the
23 projects, to individual managers on each project, which you
24 would -- which you would typically hear in a case like this.
25 Well, they can't be similarly situated because the person

1 making the decisions that Mr. Sloane isn't the same person
2 making decisions as to the class member over here in Arizona.

3 THE COURT: So is one person setting a different rate
4 for each site across the United States where these people
5 worked?

6 MR. JONES: Okay. Are we talking about -- when you
7 say rate, are you talking about their day rate?

8 THE COURT: Well, that's what you're describing it as.

9 MR. JONES: No. I'm saying that they claim that this
10 guarantee that they claim was in place prior to spring/summer
11 of 2014, even though there is no evidence of it, there is no
12 documentary evidence of -- there's not a single document that
13 references a guarantee. They are saying that the decision of
14 what the guarantee was for any project was made at a central
15 level.

16 So that to prove or disprove the existence of a
17 guarantee, that's going to rely, first, on their own documents
18 and the lack of their documents. And it is also going to rely
19 principally, almost exclusively, on the testimony of Ms.
20 Kramer.

21 It's not a situation where we're going to have to go
22 get evidence from, you know, 140 managers at 140 different
23 projects.

24 THE COURT: So you're saying, Mr. Jones, it was the
25 same guarantee for every inspector at every site nationwide?

1 MR. JONES: No. Like we talked about before, some
2 were seven, some were six, and some were five. Again,
3 according to their version of the story (indicating
4 defendants), because our version is there is no guarantee,
5 period.

6 THE COURT: Well, if it's different and it varies by
7 the number of days, then it seems to me we would need to go out
8 and look at each site and make an inquiry as to each site. The
9 sites may not, in fact, be similar.

10 MR. JONES: And I guess I'll ask the question back.

11 THE COURT: Why are five day, six day, seven day
12 periods the same or similar? Why are they not different?

13 MR. JONES: Because the key is whether or not there is
14 a guarantee. What that guarantee is, whether it's five, six or
15 seven, that's irrelevant. The key is is there a guarantee
16 and -- but -- and what makes them similarly situated is that
17 they claim that the decision as to what the guarantees were
18 were made by two people in one place, in Houston, Texas.

19 So we don't have to go to 140 different sites to
20 determine was there a guarantee at this site, was there a
21 guarantee at this site, was there a guarantee at this site
22 because the existence or non-existence of the guarantee,
23 according to them, takes place with Ms. Kramer and Mr. Sprick
24 and it ends there.

25 THE COURT: How do we know that there was no guarantee

1 for each site? How do I know that there was no guarantee at
2 Houston? There is no guarantee in Wyalusing, Bradford County,
3 Pennsylvania?

4 MR. JONES: Because if they're -- prior to the
5 spring/summer of 2014 and you are talking about an express
6 guarantee or some documentation of a guarantee, because they
7 would have been required -- they would have had to produce it
8 in response to Judge Fischer's order.

9 Because if there were a piece of paper that was sent
10 to the payroll -- you know, the payroll department that said
11 for, you know, this project in Houston, Texas, the guarantee is
12 X, they would have had to produce it. But not only did they
13 not produce any, Ms. Kramer specifically says there aren't any
14 documents.

15 THE COURT: It's your burden to show the absence of a
16 guarantee, isn't it? And to that end, let me give you this.
17 You can respond to this, if you care to. This cite, I'll read
18 from the opinion. Quote, This meeting of the minds usually is
19 memorialized in writing at the outset of the employment
20 relationship." I'm citing a case called Cash against C-O-N-N,
21 or Connecticut, Appliances, Inc. found at 2 F.2d Supp., page
22 284, a decision of the Eastern District of Texas in 1997.

23 "However, courts have recognized that a clear and
24 mutual understanding may be shown through examination of the
25 employment plea agreement and the employee's actions, that he

1 or she understood the employment plan in spite of the
2 after-the-fact verbal contentions otherwise." That's citing a
3 case called Moynihan against County of Chesterfield, Virginia,
4 found at 95 F.3d, page 1263, a decision of The Fourth Circuit
5 in 1996, saying, "We believe that in absence -- or in the
6 absence of a written contract, an employer can also demonstrate
7 the existence of this clear, mutual understanding from an
8 employment policy's practices and procedures. I'm citing a
9 case called Stein, S-T-E-I-N, against Guardsmark, LLC, which
10 was a decision as a Westlaw cite from the Southern District of
11 New York from 2013.

12 The cite Stein versus Guardsmark seems apropos here,
13 doesn't it?

14 MR. JONES: None of those cases include 541.604(b).

15 THE COURT: Are you sure?

16 MR. JONES: Yes. What all of those cases involved was
17 a fluctuating work week requirement.

18 THE COURT: Say it again.

19 MR. JONES: Fluctuating work week. And they are part
20 of a series of cases going one way and there are a whole series
21 of cases going the other way, whether under the fluctuating
22 work week reg, the agreement that the fluctuating work week reg
23 references has to be expressed at the beginning of the
24 employment relationship. And there are some courts that say
25 yes, it does.

1 There are other courts, such as those you just cited,
2 that says well, not necessarily because you can show that
3 agreement through a course of conduct. You can show the clear
4 and mutual understanding through a course of conduct. But that
5 none of those are 604(b) about -- and discuss whether or not
6 the guarantee can be established through a course of conduct.

7 In fact, I have never read a case, a DOL reg or a DOL
8 opinion letter that says anything close to that.

9 THE COURT: Right. But as a broad proposition, isn't
10 Stein against Guardsmark discussing the ability of an
11 employment term to be applied in the absence of a written
12 contract, regardless of what they are interpreting? Isn't that
13 broadly what Stein against Guardsmark does?

14 MR. JONES: Yeah. I think any case is limited to its
15 facts, and Stein is addressing the fluctuating work week, the
16 clear, mutual understanding requirement of the fluctuating work
17 week.

18 THE COURT: Why can't you use a course of conduct to
19 show a guarantee under Section 604?

20 MR. JONES: Because then you would essentially be
21 writing the guarantee requirement out of the regulation if you
22 did that.

23 THE COURT: Why?

24 MR. JONES: Because 604(b) clearly requires the
25 guarantee in the first instance and it says that the employment

1 arrangement has to include that guarantee. The DOL opinion
2 letters that I showed you said the difference between
3 compensation on a daily -- between a day rate and a salary is
4 the guarantee.

5 The case that Alex found for us said, in fact, that
6 guarantee needs to be in writing in the employment agreement in
7 the first instance or the plaintiff is entitled to summary
8 judgment.

9 And I'll tell you, just sort of a policy reason, other
10 than that, is the long discussion that you and I had
11 previously, you know, that begins with an hourly employee can
12 look like he's paid a salary if he works 40 hours every week.
13 Okay?

14 Now, if you don't have to have an express guarantee at
15 the beginning and you can show a salary based simply on a
16 course of conduct, and you have an hourly employee who worked
17 40 hours every week so his compensation is going to be exactly
18 the same every week, under your theory that employee is now
19 converted to salary.

20 And that's not the intention of 604(b) -- 604.2(b).
21 An intention is there has to be a guarantee. And the guarantee
22 is what takes care of the issue that you and I were discussing
23 earlier where it's really easy for a day rate and salary to
24 look alike. The thing is you can't just look at the wrong
25 numbers and say oh, okay, that's a salary. Because it can just

1 as consistently be a day rate. And the only way you tell the
2 difference between the two is the guarantee.

3 THE COURT: Well, that language seems strikingly
4 similar to me. Let me tell you what I'm looking at here. Bear
5 with me just a minute.

6 So the Stein case seems to interpret this, in any such
7 agreement, quote, Must contain a provision for overtime pay,
8 and the wage must be sufficient to satisfy minimum wage
9 requirements and offer a premium of at least, quote, 50 percent
10 of the hours actually worked over the statutory maximum, end
11 quote.

12 In 1968, the Department of Labor promulgated 29 CFR,
13 Section 778.114, an interpretive rule intended to codify and
14 clarify Missel.

15 So we have that regulation interpreting hours worked
16 language. That regulation in whole says this, "An employee
17 employed on a salary bases may have hours of work which
18 fluctuate from week to week, and a salary may be paid him
19 pursuant to an understanding with his employer that he will
20 receive such fixed amount as straight-time pay for whatever
21 hours he is called upon to work in a work week, whether few or
22 many.

23 "Where there is a clear and mutual understanding of
24 the parties that the fixed salary is compensation apart from
25 overtime premiums, the hours worked each work week, whatever

1 their number, rather than for working 40 hours or some other
2 fixed weekly work period, such as salary arrangement is
3 permitted by the Act.

4 "If the amount of the salary is sufficient to provide
5 compensation to the employee at a rate not less than the
6 applicable minimum wage rate for every hour worked in those
7 work weeks in which the number of hours he works is greatest
8 and he receives extra compensation in addition to such salary
9 for all overtime hours worked at a rate not less than one-half
10 his regular rate of pay; since the salary in such situation is
11 intended to compensate the employee at straight-time rates for
12 whatever hours are worked in the work week, the regular rate of
13 the employee will vary from week to week and is determined by
14 dividing the number of hours worked in the work week into the
15 amount of the salary to obtain the applicable hourly rate for
16 the week.

17 "Payment for overtime hours at one-half such rate in
18 addition to the salary satisfies the overtime pay requirement
19 because such hours have already been compensated at a
20 straight-time regular rate under the salary arrangement."

21 So that language seems strikingly similar to the
22 statute both in form and substance to the regulation here. And
23 that regulation is entitled fixed salary for fluctuating hours.

24 MR. JONES: Right.

25 THE COURT: Why can't you look at it and see that it's

1 a day rate?

2 MR. JONES: Okay. Let's -- the regulation you just
3 read is generically called the fluctuating work week
4 regulation. For the fluctuating work week regulation to even
5 apply to begin with, someone has to be paid on salary. In
6 other words, it's agreed by both sides they're already being
7 paid on a salary. And then it's just what the fluctuating work
8 week regulation deals with is how you pay overtime on that
9 salary.

10 Now, one way that you might pay overtime on salary is
11 you say that you are -- your salary covers your first 40 hours.
12 And we're talking about salary paid to a non-exempt employee.
13 Okay.

14 In other words, if I paid my receptionist -- rather
15 than hourly, if I paid her a salary, which I can do, it doesn't
16 make her exempt. She's still a non-exempt employee. I'm just
17 paying her a salary. I'll paying her a set amount every week.
18 That's the situation this covers.

19 Then all that regulation talks about is how am I
20 going to pay -- how am I going to pay her overtime. Now, one
21 way to pay her overtime would be to say your salary covers the
22 first 40 hours of your work week, or up to the first 40 hours.
23 And then for hours over 40, I would pay her full
24 time-and-a-half. So as I divide her salary for the week by 40,
25 I would get her regular rate, and just to make it simple, let's

1 say I pay her \$400 a week, so she makes -- so if that covers 40
2 hours, then she is making \$10 an hour. And as overtime, I
3 would then have to pay her \$15 an hour for every hour over 40.

4 What the fluctuating work week regulation allows if
5 the requirements of the regulation are met, is rather than
6 saying that salary covers the first 40 hours, it is -- there
7 has to be a clear and mutual understanding that your salary
8 covers however many hours you work. So if you worked 50 hours,
9 that \$400 covers your 50 hours. Okay. That \$400 covers that
10 50 hours. So that now her regular rate, rather than being \$10
11 an hour is -- what's 400 divided by 50 -- it is now \$8 an hour.

12 But because that salary basically pays her her
13 straight time for all of those 50 hours -- in other words, she
14 has already been paid the time, then what she is owed under the
15 fluctuating work week method is only the and-a-half. So if her
16 regular rate for working 50 hours in a week at a salary of 400
17 is \$8, then what she gets paid for the overtime hours for that
18 ten overtime hours, rather than being paid \$15 an hour, she
19 gets paid \$4 an hour. In other words she only gets the
20 and-a-half.

21 So that regulation isn't intended to -- and doesn't
22 define, you know, whose salary is -- who's exempt, who's not
23 exempt. The only way it applies is it applies to someone who
24 is salary, and they are non-exempt, which is a very different
25 situation than we have got in 604.2(b).

1 And what those cases that you cited to me say is that
2 clear and mutual understanding that your salary is going to
3 cover whatever hours you work, that that can be shown through a
4 course of conduct.

5 THE COURT: Well, let me ask you this. It seems to me
6 what the Stein case is saying is you can infer the existence of
7 the salary in the first place based upon course of conduct,
8 practice, actual payment, et cetera. So why, if that's so,
9 can't we infer the existence of a guarantee of a salary in the
10 first place based upon the same factors? Seems to me it's
11 analogous to this regulation you are citing.

12 MR. JONES: I mean, does it specifically say you infer
13 the salary, the existence of the salary?

14 THE COURT: Well, you can, can't you?

15 MR. JONES: No. Is that what Stein says, that you can
16 infer the existence of the salary?

17 THE COURT: Yes, I think so.

18 MR. JONES: Because it makes no sense, because again,
19 fluctuating work week only applies if you are paid a salary and
20 you are non-exempt.

21 THE COURT: But it seems to me Stein stands for a
22 fairly broad proposition, right, and it's stating that -- it's
23 stating a term of the employment itself, a basic term of
24 employment law would be those inferences. Right?

25 MR. JONES: I don't agree with that at all.

1 THE COURT: We can't make inferences with regard to
2 guarantees of a salary in the first place as a basic
3 employment --

4 MR. JONES: No. No. For all of the reasons I just
5 described. Again, if we can infer the existence of a salary --
6 I mean, of a guarantee from a course of conduct, that hourly
7 employee who works, you know, 40 or 45 works every week and
8 gets the same pay every week, they just became salaried.

9 In a situation where, you know, at that point in time
10 neither the employer or the employee intended that. That's
11 why -- that's why inference doesn't work because the same --
12 you can -- you can look at the same thing and it can be -- it
13 can consistently be one of two things. And looking at that one
14 thing, which is how much are they paid each week or every pay
15 period doesn't, in itself, tell you anything.

16 THE COURT: Well, Stein is saying in part, quote, That
17 the fixed salary as compensation may be shown through
18 examination of the employment agreement. Section 778.114
19 requires, quote, a clear mutual understanding of the parties
20 that the fixed salary is compensation and may be shown through
21 an examination of the employment agreement and the employee's
22 actions.

23 MR. JONES: Right. In that situation, that makes at
24 least some sense. And I don't agree with it. I happen to
25 agree with the cases that go the other way. But in that -- but

1 in that situation, that may make some sense. Okay. In
2 interpreting the fluctuating work week. It would make
3 absolutely no sense in interpreting 604.2(b), because again, if
4 you -- if you look at -- and I keep taking you back to this
5 hourly employee who works, you know, 45 hours every week and
6 gets paid the same amount every week. So you could put up a
7 chart, like Ms. Idalski has there, for this hourly employee and
8 it would show the same salary, the same amount of pay every
9 week. But that doesn't, by itself, make him salary.

10 THE COURT: So you are saying general employment law
11 principles don't apply to section 604?

12 MR. JONES: I'm saying that's not a general employment
13 law principle. It's a principle in addressing the fluctuating
14 work week regulation. But it -- it absolutely cannot be the
15 law with regard to 604.2(b).

16 Otherwise, anybody who works the same amount of days
17 every week or anybody who works the same amount of hours every
18 week is all the sudden going to be salary, even though there is
19 no intent for him to be, them to be.

20 Because again, you look at one thing that is
21 consistent with two things. You look at a number which is
22 equally consistent with being salary and being on the day rate.
23 You look at two numbers which is equally consistent with being
24 salary or being hourly. And looking at that number by itself
25 doesn't tell you which one it is.

1 Let's go to the guy who gets paid by the hour and
2 works 45 hours every week. His chart is going to look just
3 like the one Ms. Idalski has there. You can't just look at
4 those numbers and say well, he gets the same amount every week,
5 therefore, he is salaried.

6 THE COURT: All right. But why can't you imply the
7 existence of a salary guarantee under one regulation and not
8 under another regulation that is very analogous? The burden is
9 on you.

10 MR. JONES: Because what --

11 THE COURT: Hold on. It's your burden. It's Sloane's
12 burden to show which one it is, isn't it? It's not Gulf
13 Interstate's burden.

14 MR. JONES: I'm sorry? No, actually --

15 THE COURT: Well, it's --

16 MR. JONES: -- when it comes time for trial, that's
17 her burden. Because the salary basis is part of the
18 requirement for the exemption.

19 THE COURT: But to show the guarantee issue itself, I
20 think, isn't that your burden?

21 MR. JONES: No.

22 THE COURT: Mr. Sloane's burden now?

23 MR. JONES: Absolutely -- I mean, to show similarly
24 situated is my burden. But to show that there is not a
25 guarantee is not my burden. It's their burden. If they want

1 to say for these people who we compensate their compensation
2 based on a daily rate, then they are salaried, it is her --
3 their burden to show that there is a guarantee, because that's
4 part of the requirement of the salary basis, which is part of
5 the requirement for the exemption.

6 THE COURT: You don't have to show that the class
7 members are paid on a day rate?

8 MR. JONES: No.

9 THE COURT: How are they similar?

10 MR. JONES: They are similar because the question --
11 the relevant question is, is there a guarantee in the first
12 instance. And that question answers the question of whether
13 there's a salary basis. And that question is similar to the
14 entire class.

15 THE COURT: Well, when I think about what the theme of
16 the defense case is here, I use this line from their papers to
17 me. Quote, These inspectors perform different jobs and worked
18 in different states on different projects for different clients
19 and reported to different supervisors, end quote.

20 So don't we have to get past the facial showing that
21 each of these workers holds similarly titled positions and
22 instead look to the economic realities of what task each
23 inspector actually performed? Consequently, how can it be said
24 that every member of such a sweeping class could possibly be
25 substantially similar?

1 MR. JONES: Now we're jumping to doctrines. And
2 again, on the directly-related prong and where they fit in the
3 administrative production dichotomy and shows that they are
4 line employees instead of the staff employees.

5 Even the Hughes court, even though they limited the
6 class to a single project, I mean, it includes all pipeline
7 inspectors. So all of those different -- I mean, a welding
8 inspector, a coding inspector, a utility inspector, while they
9 are specific, in other words, specifically what they do is
10 different but their primary -- bear with me -- but their
11 primary duty, okay, is uniform. Because their primary duty is
12 to observe and to ensure that the construction of the pipeline
13 is taking place in accordance with the specifications and
14 requirements of the pipeline owner and those required by law.

15 So the fact that the welding inspector is watching
16 welding and the coding inspector is measuring mills at the
17 coding and the utility inspector is making sure that it's
18 buried at least four feet deep, those differences don't matter
19 because their primary duty is in -- is -- is generically to
20 observe and ensure that it meets the specs and requirements.

21 THE COURT: There are different levels of inspectors,
22 right, different types of inspectors?

23 MR. JONES: There are different -- well, there are
24 different types of inspectors. I just went through some of
25 these; welding, utility. Okay. But they all generally do the

1 same thing. Then there are different levels. That's where we
2 get into the supervisory versus non-supervisory.

3 For the salary basis question, they're all together.
4 They are -- that applies to everyone. Even for the supervisory
5 inspectors, if they are not paid on salary basis, if there is
6 no guarantee and, therefore, there's not a salary basis, then
7 they can't be exempt.

8 THE COURT: Well, the listing I have are chief
9 inspectors, assistant chief inspectors, CLR inspectors,
10 corrosion inspectors, electrical and instrumentation
11 inspectors, environmental inspectors, safety inspectors,
12 utility inspectors, welding inspectors and coding inspectors.

13 MR. JONES: Correct.

14 THE COURT: Does that about cover it?

15 MR. JONES: That's what -- that's the list that they
16 gave us of the type of inspectors that work on their projects.

17 THE COURT: So do they all work at the same day rate
18 on the same days; they all do generally the same thing?

19 MR. JONES: They all do generally the same thing.

20 THE COURT: In the same fields, in the same states.

21 MR. JONES: Again, that doesn't matter. Because if
22 the question is is there a guarantee and they say -- okay.
23 They say there's a guarantee for everybody. Okay. So if the
24 question is is there a guarantee, it applies to all of those
25 people, wherever they are.

1 By the same token, we get into the duties test. You
2 know, all these people are out on the production line. They
3 are production employees, they're line employees. Therefore,
4 they can't be doing what is directly related to the management
5 and business operations of the employer or its customers.

6 Now, independent discretion and judgment again as you
7 saw, you know, for the last 70 years says these people don't
8 exercise independent discretion and judgment, because what they
9 are doing is they're comparing what is being done to something
10 that says what should be done. That doesn't constitute
11 independent discretion and judgment. So it doesn't matter if
12 someone is doing that in Arizona or Pennsylvania.

13 The fact is since they're just comparing what's being
14 done with what something says is how it should be done, that's
15 not the -- that's not discretion and independent judgment. As
16 you saw the regs, the Weiss report, the opinion letters, the
17 DOL handbook, they all say these inspectors don't exercise
18 independent discretion and judgment.

19 That's how they are similarly situated. And it
20 doesn't matter whether they are in Arizona or Pennsylvania or
21 Ohio or West Virginia. I don't know the directions they are
22 but --

23 THE COURT: All right. I think we should take a short
24 recess at this point.

25 MR. JONES: Okay.

1 THE COURT: Well, maybe even take a short luncheon
2 recess. This is going to take a while to work through. We are
3 only partway through the first question.

4 What's your pleasure? Would you like a recess now for
5 lunch? It's 12:15.

6 MR. JONES: That's fine.

7 MS. SALTZ: I think that's fine, Your Honor.

8 THE COURT: Let's stand in recess for about an hour,
9 until about 1:15 and pick up where we left off and then proceed
10 with the rest of the argument. All right.

11 Court will rise. Thank you.

12 (Whereupon, a luncheon recess was taken from 12:16
13 p.m. to 1:40 p.m.)

14 THE COURT: Thank you. We're back on record now after
15 an extended luncheon recess. I apologize to counsel. I had a
16 call that I had to take that delayed me a bit. We left off
17 with, I think, a discussion Mr. Jones, I was about to ask you
18 some questions regarding Wal-Mart against Dukes.

19 Mr. Caselli, find me that quote again from Wal-Mart,
20 would you please, for my benefit.

21 We'll begin with that, if you don't mind, answering a
22 question regarding Dukes, which I'm sure you're familiar with.

23 So this is what Dukes says, relative to our case at
24 least, and many others, I expect. Quote, What matters to class
25 certification is not the raising of common questions, even in

1 droves, but rather the capacity of a class-wide proceedings to
2 generate common answers apt to drive the resolution of the
3 litigation. Dissimilarities within the proposed class are what
4 have the potential to impede the generation of common answers."

5 So that's Wal-Mart Stores, Inc. against Dukes from our
6 Supreme Court from 2011. Who wrote the Dukes decision? Who
7 does it sound like it?

8 MR. JONES: It was Scalia, wasn't it?

9 THE COURT: I think so. Who would write that other
10 than Scalia? Or some other lesser court judge who would follow
11 a Scalia-like approach to things.

12 So that's the seminal quote. Maybe not in Dukes, but
13 it's one of them. Maybe it is a seminal quote. It certainly
14 is one of them.

15 How does that work in this matter? How does it
16 square, if you will, with your discussion thus far?

17 MR. JONES: First of all, Dukes is Rule 23. So --

18 THE COURT: Well, it's moving toward that. We're
19 going to get up to that in just a moment, I think.

20 MR. JONES: I understand. But in terms of how it
21 squares with what we've been discussing so far, which is
22 section 216(b), it doesn't.

23 THE COURT: Yeah. But except what you're talking
24 about are common questions, but what Justice Scalia is saying
25 for the majority in Dukes is you also have common answers. In

1 particular, there may be a common question regarding the
2 existence of a guarantee.

3 MR. JONES: And if we're talking about Rule 23,
4 absolutely. And I guess again -- oh, what should I say? Even
5 in 216(b), similarly situated, the idea is -- and here is -- I
6 guess, sort of to back up just a second. As far as 216(b),
7 okay, I mean, we've -- I think we've gotten lost a little bit
8 in the trees of the merits. All of these questions exist and
9 they will need to be resolved.

10 But at this stage from -- for a 216(b) motion, all
11 that we need to show is that they are similarly situated. And
12 I suppose you could take the language of that there are common
13 questions that have common answers. The questions that we've
14 addressed so far; in other words, did Gulf Interstate have a
15 guarantee as a common question. And it has a common answer.

16 THE COURT: It does?

17 MR. JONES: Yes. Because they are not saying we
18 guaranteed it to some people but not others. They're saying we
19 guaranteed it to everybody. We're saying they guaranteed it to
20 nobody. And that common question of whether or not they had a
21 guarantee is going to come back again to their documents.

22 It's going to come down mainly to Ms. Kramer's
23 testimony and, you know, either a jury is going to believe her,
24 that well, even though there is no documents that say anything
25 about a guarantee, including the pay letters, we had one but it

1 was all verbal, and somehow I remembered all of that in my head
2 so that if someone had a question about it I could answer it,
3 because I had nowhere else to go to because there is no
4 documents that say that.

5 A jury is going to believe her about that or they are
6 not going to believe her about that. But it's a common answer.
7 Either they had guarantees or they didn't. Because they
8 claimed the guarantees -- remember the guarantees were made
9 by -- were decided by two people in one location.

10 And then on the duties test, it's the same thing. You
11 know, did they do work directly related to management or
12 general operations?

13 You know, I mean, that's a common question, which has
14 a common answer. Either these inspectors were production
15 employees or they weren't. Either these inspectors were line
16 employees or they weren't.

17 THE COURT: Was it the same guarantee for everyone?

18 MR. JONES: No.

19 THE COURT: It varied by location? Did it vary by the
20 rate or the hours, the days, the responsibilities?

21 MR. JONES: The guarantee varied by project. In other
22 words, whether it was seven, six or five. But again, that
23 number is irrelevant. The question is was there a guarantee,
24 period. The question of whether or not the jury is going to
25 believe that Ms. Kramer determined these guarantees; whether

1 they be seven, six or five and it was all verbal and nothing
2 ever, ever, ever was written down, and nobody ever wrote an
3 e-mail about it and nobody ever wrote a note about it and
4 nobody ever sent an email about it.

5 Despite that, it was all verbal and she had it all in
6 her head. And she was the one who had to answer the questions
7 if anybody had any questions, because there is nothing else for
8 them to go to. There is no document for them to go to. The
9 jury is either going to believe that or they're not. That
10 doesn't turn on whether it's a seven-day guarantee or a six-day
11 guarantee or a five-day guarantee, because there are no
12 guarantees.

13 THE COURT: But don't I have to look to the
14 circumstances of each individual employed? And doesn't it go
15 back, ultimately, to Dukes where the court, speaking through
16 Justice Scalia, talks about common answers? What's the common
17 answer there?

18 MR. JONES: Exactly what I've been saying, that the
19 common answer to the question of whether there were guarantees
20 comes down to whether or not the jury believes Ms. Kramer.
21 Because Ms. Kramer says me and Mr. Sprick decided what the
22 guarantee was for every project. Okay.

23 Understand the question is, is there a guarantee. The
24 question was this is their story. Okay. Their story is
25 despite there is no documentation of this, despite the fact

1 that no pay letter says a guarantee, their story is that,
2 despite that, the fact that there's a complete lack of evidence
3 that you would expect to be there if there was a guarantee,
4 their story is that Ms. Kramer decided what they were going to
5 be and then never wrote anything down and everything was
6 verbal.

7 And she had -- she obviously had -- I mean, the import
8 of all of this is she had to have it all in her head, because
9 there is nowhere else to look. There is no document to look
10 at. If someone comes and asks her what's the guarantee for X
11 project, she had nowhere to look because there aren't any
12 documents. It had to be in her head.

13 That's the common answer. If the jury believes her,
14 that, you know, we had this -- we had guarantees and they were
15 all verbal and there is no documents, it was just all in my
16 head, if they believe her about that, that's the common answer
17 to the question of were there guarantees.

18 If they don't believe her about that, that's a common
19 answer to the question of whether there were guarantees.
20 Because if they don't believe her about that, then there were
21 no guarantees at any project, regardless of how many days they
22 claim they had as a guarantee on that project.

23 THE COURT: All right. Well, how did she know which
24 to -- strike that.

25 How did she know what to pay each of these employees?

1 Where did she get the numbers? Is that number the seven day --
2 seven calendar-day guarantee, six calendar-day guarantee, the
3 five calendar-day guarantee? Each worker wasn't paid the same
4 rate.

5 MR. JONES: No. Because they were paid the day rate.
6 That's the answer. There wasn't a salary. There wasn't a
7 guarantee. That's their story now. But back then, they were
8 being paid a day rate. So that's how she knew how to pay them.
9 She paid them for days worked and she paid them for days that
10 they decided -- for sick days and holidays, they decided they
11 were going to pay them anyway.

12 THE COURT: Why isn't the day rate merely the salary
13 expressed in terms of days?

14 MR. JONES: Why is it?

15 THE COURT: Why isn't the day rate merely the salary
16 expressed in terms of days?

17 MR. JONES: Because 604.2(b) says if that's what
18 you're going to have, you have to have the guarantee.

19 THE COURT: Well, could the argument be made that the
20 Gulf Interstate letters provided that guarantee?

21 MR. JONES: That what?

22 THE COURT: That the Gulf Interstate letters provided
23 that guarantee.

24 MR. JONES: Absolutely -- prior to the spring/summer
25 2014, absolutely not. Because if you -- I mean, the testimony

1 from Ms. Kramer is that prior to the time they sent out these
2 reclassification letters, no pay letter used the word
3 guarantee. They said things -- most of them said like \$300/day
4 worked.

5 Mr. Sloane's said whatever his day rate was per
6 calendar day. But then in parentheses says as approved by the
7 client. Now, that's not a guarantee. Anything that is subject
8 to a third-party approval can't be a guarantee.

9 THE COURT: Do you have to use the word guarantee?

10 MR. JONES: I'm sorry?

11 THE COURT: Do you have to use the explicit word
12 guarantee to make it --

13 MR. JONES: If you're a company that understands,
14 okay, we want to make this a salary and understand that to make
15 a salary we have to guarantee you a certain number of days per
16 week, then why wouldn't you? And when they sent the
17 reclassification letters, they did. It's very easy to do. You
18 put it in the pay letter, instead of \$365 per day worked, which
19 is a day rate, instead of saying that, you do what they did in
20 the spring and summer of 2014 and say \$365 a day, five days
21 guaranteed.

22 It's very simple to do. If you understand that this
23 is what we're trying to do, why wouldn't you just -- I mean,
24 all it takes it putting that one word in the pay letter and
25 then there is no question.

1 THE COURT: Let me ask you this, Mr. Jones. In
2 Sloane's case, is it \$387 per day or is it \$387 per day worked?

3 MR. JONES: His is \$387 per calendar day as approved
4 by the client.

5 THE COURT: Excuse me. The last part.

6 MR. JONES: As approved by the client. Okay. Which,
7 again, can't be a guarantee. Because if something is
8 conditioned on what a third party might do, okay, if the third
9 party has the power to not approve it, which is what his pay
10 letter says, then that's not a guarantee. That's how you're
11 going to get three -- whatever it is, \$367 per calendar day, as
12 long as the client approves it.

13 But if the client doesn't approve it, you're not going
14 to get per calendar day.

15 THE COURT: But per calendar day isn't a day rate, is
16 it? Is per calendar day a day rate?

17 MR. JONES: Yes.

18 THE COURT: Or is it per day worked?

19 MR. JONES: Isn't it the same thing?

20 THE COURT: You tell me.

21 MR. JONES: I mean, it's exactly the same thing. If
22 you are going to get paid, you know -- okay. Back up. Okay.
23 If you're working a seven-day schedule, which they were on that
24 project, then per calendar day, which is you're working an
25 entire schedule, okay, it's the same thing as a day rate. But

1 once -- and then once you add the as approved by the client,
2 okay, then you've taken away any argument that by saying we're
3 going to pay you \$365 per calendar day, that that is a
4 guarantee. Because it can't be a guarantee if some of it can
5 be taken away by a third party.

6 THE COURT: If you make \$100 per calendar day versus
7 per calendar day worked and you work four days, you still get
8 paid \$500 under the first scenario, even if you are watching
9 fireworks in New York City, but only \$400 under a day worked
10 regime. Right? So \$100 per calendar day versus per calendar
11 day worked, and you work four days.

12 MR. JONES: I work four days in a --

13 THE COURT: So you are paid \$500 under the first
14 scenario, even if on one of those days, the last day, you're
15 down in New York City watching fireworks for Independence Day,
16 and you are paid \$400 under a day worked regime. Right?

17 MR. JONES: Right.

18 THE COURT: Okay. The rate, the rate and not the
19 payment itself -- in other words, wasn't Sloane guaranteed
20 payment for every calendar day, just not necessarily at that
21 rate as the letter reads? Do you agree with that?

22 MR. JONES: Okay. Run that by me again.

23 THE COURT: Well, it's the rate -- he's paid \$387 per
24 calendar day, as approved by the client.

25 MR. JONES: Correct.

1 THE COURT: All right. So the rate and not the
2 payment itself -- in other words, wasn't Mr. Sloane guaranteed
3 payment for every calendar day, just not necessarily at that
4 rate? Isn't that what the letter reads? \$387 per calendar
5 day, as approved by the client.

6 MR. JONES: That he's going to be paid some other rate
7 for other days? Is that what you're saying?

8 THE COURT: No. He's paid \$387 per calendar day, as
9 approved by the client.

10 MR. JONES: Correct. So he's on a seven-day schedule.

11 THE COURT: What's being approved, the rate?

12 MR. JONES: No. The --

13 THE COURT: The payment?

14 MR. JONES: The rate is already approved. I mean,
15 that's in his pay letter. The rate is approved. The rate has
16 already been agreed to with the client. What is as approved by
17 the client is the number of days. So if he's at work -- let's
18 say that he -- he's on a seven-day schedule. Most weeks he's
19 working seven days. So he's getting paid \$365 per calendar
20 day, right, because he's working seven days, because that's his
21 schedule.

22 Let's say on week four the contractor decides we're
23 not going to work on Saturday. So he only worked six days.
24 Right? So \$365 per calendar day would mean he would also get
25 paid for that seventh day that he didn't work. Although, as

1 we've gone through before, he actually did work those days.
2 But let's assume he didn't.

3 So his pay letter says he would get paid for seven
4 days as approved by the client. So if the client doesn't
5 approve payment for that seventh day, he's not going to get
6 paid it. And there's -- and that's why it's not a guarantee,
7 because some third party can take part of it away.

8 THE COURT: Does anyone know -- I don't want to throw
9 you off, either defense counsel or Ms. Piazza, do we have a
10 copy of the pay letter, or can you reference that for me in an
11 ECF document? You don't have to break off your argument, Mr.
12 Jones. I'm just thinking of that. Do we have a copy of the
13 pay letter?

14 MS. MS. IDALSKI: Your Honor, we have several. Do you
15 want to see?

16 THE COURT: At some point. I don't need to see it
17 this second, I guess. But we've got it, and you can take that
18 up when you rebut this argument. Thank you.

19 Go ahead, Mr. Jones.

20 MR. JONES: I'm sorry. I was just explaining to your
21 questions.

22 THE COURT: I've got the gist of it there. What else
23 do you want to tell me on the first section, which is the
24 conditional certification question, that hasn't already been
25 addressed?

1 MR. JONES: I think we've pretty much covered it.

2 THE COURT: Exhausted it. I do, too.

3 Let's go on then with the Rule 23 question, which we
4 have touched on a bit. I've got some questions for you here,
5 as well.

6 MR. JONES: Sure.

7 THE COURT: But go ahead and start off on your
8 argument with me. Actually much of what we have already
9 covered also applies to the Rule 23 motion, as well.

10 MR. JONES: Under 23(a) you've got numerosity, which
11 they haven't contested here. There's at least 146 pipeline
12 inspectors employed by Gulf Interstate in Pennsylvania during
13 the relevant time period.

14 Then the issue of commonality. We go back to it and
15 recall under Dukes, Dukes said there need be only one common
16 issue to support classification. Here, we've got two common
17 issues. First, you've got the salary basis test; was there a
18 guarantee. And as we've discussed before, that has -- that is
19 a common question which has become a common answer, which will
20 come from the jury's belief or disbelief of Ms. Kramer's
21 testimony about the guarantee and in the absence of any
22 documents to support that.

23 Then the second common question is on the job duties.
24 You know, we talked about the directly related and that they
25 are production employees and that they're line employees.

1 Those are common questions and they have common answers.

2 And finally on the discretion, independent judgment.
3 Because of the DOL's treatment, you know, of inspectors in the
4 regulations, saying that they don't exercise discretion,
5 independent judgment, as far as being -- you know, been
6 consistent over the last 70 years in that position that what
7 these people do is that they observe the construction to make
8 sure that it conforms with the specifications that are provided
9 by the client and by the law.

10 THE COURT: Let me ask you this --

11 MR. JONES: Sure.

12 THE COURT: -- right off the mark. Are you sure
13 you're in the right court now? The plaintiff's complaint
14 indicates that both he is a Texas resident and that the
15 defendant, Gulf Interstate, is a citizen of Texas, by virtue of
16 maintaining its headquarters in Houston.

17 MR. JONES: Right.

18 THE COURT: So I'm, therefore, inclined to ask whether
19 diversity jurisdiction is proper as to plaintiff's Rule 23
20 claims. So this is what I'm looking at. Quote, In a class
21 action suit, diversity between citizens requires that there
22 must be complete diversity between the named representatives of
23 the class and the defendants.

24 I'm citing for that proposition in re: Prudential
25 Insurance Company of America Sales Practices Litigation, found

1 at 962 Fed Supp. 450, 502, a decision in the District of New
2 Jersey in 1997, which was affirmed sub nom. by our Circuit, 148
3 F3d., 283, a decision of the Circuit in 1998.

4 So specifically, even if supplemental jurisdiction
5 under Section 1367 would be appropriate for a pendant state law
6 claim or claims brought under the FLSA class, doesn't a
7 distinct class brought under Rule 23 require a separate basis
8 for federal jurisdiction?

9 How would the common nucleus of operative facts
10 analysis play out as to the proposed Rule 23 class here?

11 MR. JONES: Your Honor, the 1997 case that you just
12 referenced is before CAFA, The Class Action Fairness Act.
13 Which provides the basis of jurisdiction here.

14 THE COURT: Well, flesh that out for me.

15 MR. JONES: I'm not sure that I can.

16 THE COURT: Do the best you can.

17 MR. JONES: There's a \$5 million -- as long as \$5
18 million total including fees is at issue, and I'm fairly sure
19 it doesn't require complete -- it doesn't require diversity at
20 all, as I understand it, as I recall it.

21 THE COURT: So that Prudential Insurance Company case
22 has no applicability to the matter at hand.

23 MR. JONES: Exactly, because it's been superseded by
24 statute.

25 THE COURT: Okay.

1 MR. JONES: I wish I was more familiar with CAFA.

2 THE COURT: No. Your point is made.

3 Did you plead CAFA jurisdiction here and were you
4 required to?

5 MR. JONES: I don't know if we specifically pled it.

6 THE COURT: I don't recall.

7 MR. JONES: But I don't believe we were specifically
8 required to.

9 THE COURT: Why not?

10 MR. JONES: What's that?

11 (Off-the-record discussion between counsel.)

12 MR. JONES: Apparently I'm told we had supplemental
13 jurisdiction, so we didn't plead CAFA.

14 THE COURT: Well, I don't recall that from the --

15 MR. JONES: I don't believe we specifically pled CAFA
16 but --

17 THE COURT: Let me ask you this, Mr. Jones.

18 MR. JONES: Yes.

19 THE COURT: My understanding is that the scrutiny that
20 must be applied on the Rule 23 certification motion is
21 considerably more stringent in searching because that
22 certification would establish a class as a legal matter. So do
23 you agree with that characterization, and what might it mean
24 when applied to this case in particular?

25 MR. JONES: I agree with the characterization in terms

1 of what we've been discussing so far. I don't think it has any
2 bearing on it, because I believe that the idea of the common
3 questions that we've been discussing; you know, is there a
4 guarantee and then, you know, are they production line
5 employees and do they, by the nature of what they do, meet the
6 discretion independent judgment?

7 I think that meets any standard that you can put to it
8 in terms of there being common questions with common answers
9 that will predominate over any individual issues.

10 In fact, for example, with the guarantee question
11 there won't be any individual issues involved in that, because
12 Ms. Kramer has said, you know, our story is as to why we claim
13 there's a guarantee, you know, is that those decisions were
14 made by two people in one location and then applied to
15 everybody. So there is no individual questions. There's -- in
16 other words their story is not that we guaranteed a minimum
17 number of days to people on this project, this project and this
18 project but not this project, this project and this project.

19 Their story is we guaranteed a minimum number of days
20 to everybody. So it's a common question, has a common answer.
21 It doesn't involve individualized issues because it all comes
22 down to Ms. Kramer.

23 And similarly, whether they are a line employee or a
24 production employee, that -- that is not going to involve
25 individualized questions because these people -- it's not like

1 any of these inspectors do their job from some remote location.
2 They are all out on the production line. They are all
3 production employees. They are all line employees. So you've
4 got a common question with a common answer without any
5 individualized issues.

6 THE COURT: On that point, though, let me swing back
7 to something else.

8 MR. JONES: Okay.

9 THE COURT: Why do you think there should be
10 supplemental jurisdiction or why do you think supplemental
11 jurisdiction would be proper for an entirely distinct class?
12 Wouldn't that class have a different nucleus of operative
13 facts, depending on different exemptions, different locations,
14 different legal questions? Why is supplemental jurisdiction
15 proper for an entirely distinct class? Everything is
16 different, isn't it?

17 MR. JONES: Not everything.

18 THE COURT: Well --

19 MR. JONES: I mean, the operative -- I mean, just take
20 our conversation here, Your Honor. I mean, for the FLSA
21 claims, we've been talking about the very same things from the
22 FLSA claims that we're been talking about for Pennsylvania
23 claims. It is the same nucleus of operative facts. In fact,
24 there's the same common questions. There's the same common
25 answers. It's not entirely different at all. It is still, was

1 there a guarantee in the first instance; were you a production
2 employee or a line employee.

3 The only difference between the two is that there is
4 no highly compensated under Pennsylvania law.

5 THE COURT: Let me give you a case from a Federal
6 District Court in Texas, of all places. This is what this
7 court said. "Plaintiffs are, instead, asking the Court to
8 exercise supplemental jurisdiction over an entirely different
9 class of state law claims which provide for entirely different
10 remedies. Thus, the Court must determine whether the Dinns" --
11 that's the gentleman, D-I-N-N-S -- "claims under the DTPA are
12 maritime torts that may be preempted by federal maritime law or
13 -- excuse me -- "that may be preempted by federal maritime law
14 or torts of local concern governed by Texas law. For the court
15 to exercise admiralty jurisdiction over a tort claim, the
16 activity from which the claim arises, quote, must satisfy
17 conditions of both location and connection with maritime
18 activity."

19 The case is Dinn, D-I-N-N, against Hooking Bull
20 Boatyard, Inc., which is a decision from The Southern District
21 of Texas from July 6th of 2009. It's 2009, Westlaw 2161676.
22 Appeared to have declined to exercise jurisdiction in that
23 case. Different legal questions. Different remedies.
24 Different exemptions.

25 Isn't that what we have here?

1 MR. JONES: No. And there is no question of
2 preemption. That is -- as I understand what you read, that was
3 Jones Act case in the question of whether you were going to
4 separate jurisdiction over a state law common law tort claim.
5 It was a very different question than -- I mean, these are --
6 these are both wage and hour overtime claims. The reason that
7 plaintiff's claim that the member of FLSA Class and
8 Pennsylvania Class were entitled to over time are exactly the
9 same, the questions that we have gone through several times are
10 exactly the same.

11 I can't think of a situation where it would be much
12 more common, a common nucleus of operative facts than we have
13 here.

14 It's just that there is a state law which addresses
15 the same issue as the FLSA. And under that state law you bring
16 a Rule 23 class. But the facts underlying both claims are
17 exactly the same.

18 THE COURT: Well, indeed it's a Jones Act case. But
19 my point is there was simply different legal remedies that
20 destroyed supplemen tal jurisdiction.

21 Let me give you a different case. This is from New
22 England. "In this case it is clear that the claims of the
23 first three subclasses and the claims of fourth subclass do
24 not, quote, derive from a common nucleus of operative fact, end
25 quote. Each subclass asserts different factual scenarios

1 involving overpayments made by covered individuals for
2 particular services.

3 The first subclass asserts overpayments as a result of
4 misdesignation of participating providers. The second asserts
5 overpayments because of partial processing of claims. The
6 third asserts overpayments because of the miscrediting of
7 deductible payments. The fourth asserts overpayments because of
8 miscalculation of percentage copayments.

9 Indeed, the fourth class asserts classifications of
10 two plans that are different from the plan at issue and the
11 claims asserted by the first three subclasses. There are
12 virtually no overlapping fact between these claims except for
13 the fact that they are made against the same defendant. The
14 claims as asserted by subclasses could have easily been brought
15 as four separate class actions that would not ordinarily be
16 expected to be consolidated into one judicial proceeding.

17 Therefore, this is not an appropriate case for the
18 exercise of supplemental jurisdiction over the Caranci
19 plaintiffs claims. I'm citing the case of Caranci,
20 C-A-R-A-N-C-I, against Blue Cross and Blue Shield of Rhode
21 Island found at 194 FRD, page 27, specifically page 37, by The
22 District of Rhode Island from 2000. So that's another case --
23 I mean, not a Jones Act case but you see my point.

24 MR. JONES: No, actually I don't. Because as I
25 listened to you read --

1 THE COURT: My point is there are different legal
2 remedies that may destroy supplemental jurisdiction.

3 MR. JONES: But that's not what that says. That says
4 there is no common nucleus of the operative facts. They are
5 different claims entirely. They are based on different
6 underlying facts. One is an overcharge because they did it
7 this way. One is an overcharge because they did it this way.
8 Another is an overcharge because they did it this way. So
9 there is no common nucleus of operative fact.

10 Here, there is clearly of the common nucleus of the
11 operative facts, because both in the FLSA claim and the
12 Pennsylvania Minimum Wage Act Claim, they are exactly the same
13 underlying operative facts; that there was no guarantee,
14 therefore, there is no salary basis, therefore they are not
15 exempt. They are production employees. They are line
16 employees. Therefore, they are not exempt. That they didn't
17 exercise discretion of independent judgment. Therefore they
18 are not exempt. Those exact same operative facts exist in
19 both.

20 The case you just read to me had different operative
21 facts in each subclass. And as I heard it, that's exactly why
22 the Court ruled like it did.

23 THE COURT: So there are or there are not different
24 exemptions under Pennsylvania Minimum Wage Loss and the FLSA?

25 MR. JONES: There is one additional under the FLSA

1 that doesn't exist under Pennsylvania.

2 THE COURT: What about a different reward? What about
3 backpay? What about punitive damages? If the differences
4 don't matter, then why is not the decision of my sister court,
5 The Southern District of Ohio in Hughes controlling?

6 MR. JONES: Which decision?

7 THE COURT: Well --

8 MR. JONES: {Laughter} We've got the --

9 THE COURT: It seems to me what I've got here is the
10 summary judgment decision should control. I'm referencing
11 Judge Sargus's decision in summary judgment.

12 MR. JONES: It doesn't control, number one, because
13 there is no summary judgment before this Court. And number
14 two, Judge Sargus got it absolutely, completely wrong, which
15 eventually hopefully the Sixth Circuit will recognize.

16 THE COURT: Well, we had a telephone conference call,
17 whatever it was, two months ago, and it seems to me the whole
18 argument on the telephone conference -- I think you were on
19 that call, Mr. Jones, that the -- there are differences in
20 exemptions that come into play with this new subclass.

21 Now I have said well, what about supplemental
22 jurisdiction along the same lines, and I'm told the differences
23 don't matter.

24 MR. JONES: No. But for supplemental jurisdiction,
25 the fact that Pennsylvania does not have are a highly

1 compensated exemption and the FLSAs does isn't enough of a
2 difference to defeat supplemental jurisdiction. We were
3 talking about two very different issues -- in the phone call we
4 were talking about one thing. Now we are talking about
5 something completely different. We're talking about
6 supplemental jurisdiction now. We were talking about something
7 completely different on the phone call.

8 THE COURT: Are they really all that different?

9 MR. JONES: Is what all that different?

10 THE COURT: When we talked about it on the phone, when
11 I look back it's almost three months ago now, the end of
12 August, and what we're talking about today, if the exemptions
13 aren't that big a difference, the exemptions are not that
14 different, then the Hughes decision may be more controlling
15 than I thought it was initially. I'll think about that.

16 MR. JONES: The Hughes --

17 THE COURT: Judge Sargus may be more on point than you
18 are willing to give him credit for.

19 MR. JONES: No. The Hughes decision --

20 THE COURT: You're not like Paul Clement, are you?
21 You don't think all district court judges are stupid, do you?

22 MR. JONES: {Laughter} No. But they do get things
23 wrong. And Judge Sargus got this one wrong.

24 THE COURT: Absolutely. No question about it.

25 MR. JONES: Judge Sargus, in the Hughes summary

1 judgment, had only to do with the FLSA. Our point in our Rule
2 23 motion about how that ruling doesn't apply to this case or
3 shouldn't apply to this case has nothing to do with the fact of
4 the difference of one exemption. It has to do with, number
5 one, we don't have a -- we're not dealing with a summary
6 judgment here. And number two, that Judge Sargus just
7 completely got it wrong and took a line of cases that have
8 nothing to do with this case, took a single out of one of those
9 cases and based his whole opinion about that and essentially
10 wrote the guarantee requirement out of the analysis.

11 THE COURT: By the way, where is that case? Is that
12 on appeal now to the Sixth Circuit?

13 MR. JONES: No, because --

14 THE COURT: Tell me where we are.

15 MR. JONES: The summary judgment was only as to the
16 two named plaintiffs. And we have like 79 opt-ins in that
17 case. So it applies to the two plaintiffs but not to the 79
18 opt-ins. The judge asked us to submit -- we have a renewed
19 motion for Rule 23 class. The defendants have a motion for
20 decertification.

21 And so Judge Sargus asked us to brief the issue of how
22 the summary judgment ruling affects those. That briefing has
23 been completed. And we have not heard back from the judge yet.

24 So the summary judgment is interlocutory at that
25 point. And we have asked Judge Sargus to sever those claims

1 out so we can take them up on appeal and just stay the reminder
2 of the case while -- until The Sixth Circuit tells us the
3 answer to the questions.

4 THE COURT: Understood. And he's taken that under
5 advisement?

6 MR. JONES: Yes.

7 THE COURT: All right. Well, either the existence of
8 a new exemption is a material different between this case,
9 Hughes is not controlling, you may have a jurisdictional
10 problem then with the Pennsylvania Class, or Hughes is more
11 controlling than acknowledged.

12 So if the absence of that exemption -- if the absence
13 of that exemption changes the entire outcome, then the
14 Pennsylvania class may not be appropriate for supplemental
15 jurisdiction.

16 MR. JONES: But it doesn't change the entire outcome.
17 It removes an exception for any -- for a subset.

18 THE COURT: But there will be different class members
19 in both classes. Won't that create a different body of
20 distinct facts, what each members' letter said, for example?
21 Unless they said the same thing. Whether guarantee was
22 expressed in a different way.

23 Ms. Idalski has some of the letters or at least some
24 of the letters that relate to -- and I assume you do, Ms.
25 Piazza, if you can find them there.

1 MR. JONES: I mean, here's the thing with the letters
2 Your Honor. What you'll see with the letters is anything prior
3 to spring/summer of 2014 will not have -- won't say a thing
4 about a guarantee or express a guarantee. The letter after
5 then -- and they didn't all go out at once, they went out --
6 they trickled out. So you've got from April to June or July
7 where these reclassification letters went out. You'll see the
8 word guarantee in those.

9 And then any new employee, you know, after that,
10 you'll see the word guarantee in those. But you know, and I
11 say that just with very careful in looking at the letters that
12 she shows you to distinguish between the ones prior to mid
13 April of 2014 and those that come later. The only ones that
14 you'll see that say the word guarantee are after the spring and
15 summer of 2014.

16 THE COURT: Well, I understand that. But why am I
17 prevented from interpreting those 2014 letters as merely
18 clarifying Gulf Interstate's prior practice as that of a salary
19 guarantee? That's a reasonable interpretation for the Court to
20 make, isn't it?

21 MR. JONES: If you are making a finding of fact.
22 Especially in 216(b), you can't make any merits determination?
23 And under Rule 23, it's not a determination you are required to
24 make. I mean, that issue is out. That is one interpretation.
25 But there's an alternative interpretation, which is ours.

1 THE COURT: Well, just because one says guarantee and
2 the other does not doesn't mean that one is a guarantee and the
3 other is not.

4 MR. JONES: If the ultimate determination is that the
5 guarantee doesn't have to be expressed in the employment
6 agreement. Remember, there is the case law that says it needs
7 to appear. Okay. Then you're right in terms of just because
8 one says it and one doesn't doesn't mean as a matter of law.

9 But still you've got the whole fact issue of whether
10 there is a guarantee to begin with. And this goes back, once
11 again, to Ms. Kramer and her story.

12 So the only way you can get to where you just said you
13 could get to is to make, in connection with these procedural
14 motions, determinative factual findings that -- on a record
15 that's not intended to make factual determinative findings. If
16 we're going to --

17 THE COURT: The Court doesn't make factual findings at
18 the Rule 23 stage? The District Court doesn't make factual
19 findings at the Rule 23 stage?

20 MR. JONES: Only -- only to the extent necessary to
21 determine whether the requirements of Rule 23 are met.

22 THE COURT: Well, the existence or nonexistence of a
23 guarantee, it seems to me, is a necessary fact that I would
24 make at the Rule 23 stage, isn't it?

25 MR. JONES: Absolutely not. That is the principal

1 issue in this case. There is evidence way beyond what is in
2 these procedural motions that go to that issue that needs to be
3 considered before a factual finding can be made about -- you
4 know, about something that is the principal issue in this case.

5 I also remind, Your Honor, that discovery in this case
6 was bifurcated. That the only discovery we have done so far is
7 for that necessary for the motions. And merits discovery
8 hasn't even begun yet.

9 So the question of the guarantee is not one that has
10 to be decided on Rule 23 because the question of the guarantee
11 is the common question and the common answer. And that's all
12 you have to determine on a Rule 23 motion.

13 THE COURT: And you think determining the question,
14 the necessary fact, as I believe, of a guarantee, the existence
15 or non-existence is going too far ahead?

16 MR. JONES: Absolutely.

17 THE COURT: Let me ask you this.

18 How many individuals would comprise the Pennsylvania
19 Class, and would that number satisfy the circuit's recent
20 decision, a decision earlier this year, entitled in re:
21 Modafinil Antitrust Litigation, which is found at 837 F.3d,
22 page 238. The court in that case, Modafinil, stated that a
23 district must consider, quote, The ability of individual class
24 members to pursue their cases through the use of joinder, end
25 quote, particularly where the putative class does not exceed 40

1 members.

2 What do we have here?

3 MR. JONES: We have 146, Your Honor. I'll also note
4 in the response that the defendant did not contest numerosity.

5 THE COURT: Let me ask you this. The briefs reveal a
6 dispute as to the existence of a highly compensated workers
7 exemption under Pennsylvania's Minimum Wage Act. Do the
8 parties agree on that statement of the law; and if so, what
9 other exemptions might apply under that Act?

10 MR. JONES: Okay. First of all, there is no highly
11 compensated exemption under the Pennsylvania Minimum Wage Act.
12 That's a -- that exists under the FLSA but not under
13 Pennsylvania law. Other than that, the exemptions are the same
14 as far as executive and administrative.

15 THE COURT: All right. Let me ask this again.

16 MR. JONES: Sure.

17 THE COURT: I am looking at your brief and I'm looking
18 at Gulf Interstate's briefs. There appears to be a dispute
19 between the parties as to the existence of a highly compensated
20 worker exemption --

21 MR. JONES: Right.

22 THE COURT: -- to the Minimum Wage Act here in
23 Pennsylvania.

24 MR. JONES: Right.

25 THE COURT: Do the parties agree on that statement of

1 the law? And are there other exemptions that might apply under
2 the Act?

3 MR. JONES: Are you saying do we agree that there's a
4 dispute?

5 THE COURT: There appears to be a dispute. I'm
6 looking at the papers.

7 Do you agree on that statement of the law, the
8 existence of a highly compensated worker exemption under
9 Pennsylvania Minimum Wage Act.

10 MR. JONES: I guess you'd have to ask Ms. Idalski
11 about that, if they're going to take the position that there is
12 one. Because the case law is fairly clear that there is not
13 one, including the determination by Judge Fischer in this case.

14 THE COURT: All right. Let me ask you this. What
15 would be the appropriate course of action were the Court to
16 refuse Mr. Sloane on adequacy grounds? Isn't he susceptible to
17 several challenges on both credibility and exemption grounds
18 that interfere with his ability to adequately safeguard the
19 interests of the class as a whole?

20 MR. JONES: There is several questions there. The
21 first one would be if the Court were to determine that he was
22 not an adequate representative, I think the case law is fairly
23 clear that in that situation, the plaintiffs are given the
24 opportunity to provide another class representative.

25 Now, what and you were asking about -- what was the

1 second part of the question. Now, what -- what was the second
2 part of the question?

3 THE COURT: Well, I think you have answered it.

4 MR. JONES: Okay.

5 THE COURT: Why did you pick a person who is
6 apparently a three-time felon to be your class representative?
7 Not to put too fine a point on it.

8 MR. JONES: At the time -- I understand. I guess the
9 first answer to that question is we didn't know it at the time.

10 THE COURT: He's not the most savory choice for the
11 Court or anyone else to digest, is he?

12 MR. JONES: I --

13 THE COURT: He didn't lie to you, did he?

14 MR. JONES: No. I didn't ask him, like they didn't
15 ask him when they hired him. It didn't matter to them when
16 they hired him. Plus, the fact that this is a man that has
17 turned his life around since then.

18 And I think the case law is fairly clear that this --
19 someone's criminal background does not disqualify them from
20 being a class representative unless the crime of which they are
21 charged relates directly to the claim they are making. I mean,
22 all of the crimes of which he was charged and convicted have
23 nothing to do with whether or not Gulf Interstate properly paid
24 its pipeline inspectors.

25 THE COURT: All that is true. But you know, unlike

1 Gulf Interstate now, you're going to put Sloane's credibility
2 at issue under Federal Rule of Evidence 609, aren't you?
3 That's a little different than hiring him to be an inspector of
4 pipelines up in Wyalusing, Bradford County, Pennsylvania. I
5 mean that's where we are now, in going forward with this case
6 in this court, with a jury that might be sitting next door here
7 (indicating).

8 MR. JONES: I understand that. And I think, you know,
9 we can convince the jury that none of that has anything to do
10 with the claims in this case.

11 THE COURT: Okay. All right. Lastly, let me ask you
12 this.

13 MR. JONES: Sure.

14 THE COURT: Where is this action heading? What are
15 the next steps that this Court should take, in your opinion?

16 MR. JONES: Rule on these two motions.

17 THE COURT: Well, I know that. But where are we going
18 after that?

19 MR. JONES: That depends on the Court's rulings.

20 THE COURT: Where do you think it should go Mr. Jones?

21 MR. JONES: I'm sorry?

22 THE COURT: Where do you think it should go?

23 MR. JONES: Where do I think it should go? I think
24 the Court should grant both of the motions. We'll have a
25 period where people will have a chance to opt-in on the 216(b)

1 claim. We'll send out notice to the Rule 23 class and give
2 anybody a chance to opt-out, should they choose to do so.

3 We'll -- once we -- the opt-in period closes and we
4 know what the universe of the FLSA class is, we'll complete any
5 merits discovery, and at that point proceed to trial.

6 THE COURT: Okay. Good. Thank you.

7 MR. JONES: Sure.

8 THE COURT: All right.

9 Ms. Idalski, let's hear from you. I was going to
10 break this up, but I thought it was, perhaps, easier to just
11 hear from Mr. Jones on both of these issues.

12 MS. MS. IDALSKI: Yes, Your Honor.

13 THE COURT: Why don't we do them in this order, as
14 well. Let's talk about the FLSA conditional certification
15 first, followed by the Rule 23 issues.

16 MS. MS. IDALSKI: Sure, Your Honor. And I have a few
17 points to address.

18 Plaintiff clearly can't show that there's a
19 violation -- there's an inference of a violation of the FLSA.
20 We've been hearing now from Mr. Jones for, what, three for four
21 hours? He cannot show the Court that there's a violation of
22 the FLSA. It is his burden to show an inference of a
23 violation. He has not done that. And he can't do it because
24 there is no evidence.

25 This is the second bite at the apple for the

1 plaintiff. And they have less evidence in this case than they
2 have in Ohio.

3 And I want to take you through specifically the Ohio
4 case and just highlight the evidence that Judge Sargus had. So
5 I'm going to do that in a minute.

6 But I want to go to the -- you hit the nail on the
7 head. You just zeroed in on the key question here. A day rate
8 means you get paid for days you work. That's what a day rate
9 means. And a salary is a set amount that you receive every
10 week whether you work or not. Okay.

11 And I'm not sure what kind of standard that Mr. Jones
12 is trying to hold GIFS to. But those are the definitions of a
13 day rate and a salary. Okay?

14 So the evidence shows, based on the payroll and
15 Sloane's testimony, that he received pay for every day that
16 he -- whether he worked or not, he received pay throughout
17 every calendar day in six months. Okay. And you said, Mr.
18 Jones, were there any days that Mr. Sloane did not work. So
19 let me answer that question first.

20 Let me show that, Your Honor. Yes, the answer to that
21 question is, "On July 5th" -- and you went right to the
22 testimony, Mr. Sloane testified. "So yeah, period ending
23 Friday, the date was actually Saturday. So Friday was the 4th.
24 I worked half a day Friday at the job site and went to New York
25 City that evening, because I remember we saw fireworks and

1 then -- or did I -- I think I worked. Yeah, we saw fireworks
2 in New York City, so I was off Saturday, July 5th, and then I
3 go back on Sunday to the job site."

4 There is no holiday. There's no holiday on July 5th.
5 I'm not sure where -- that's not in evidence. I'm not sure
6 where Mr. Jones is getting that.

7 Okay. So if you look at Mr. Sloane's time sheet, he
8 says he didn't work -- this is the time sheet that Thomas J.
9 Sloane submitted to Gulf Interstate. He says he did not work
10 on Saturday, and he worked a total of six days. This is the
11 time sheet that his supervisor, Randy Groves, approved and
12 turned in to Cathie Kramer in payroll. Yes, he worked Saturday
13 and he worked a total of seven days. That's because he's
14 guaranteed a salary. And he gets paid a salary every week
15 whether he works or not. That's a salary.

16 I don't know how much more we can prove here. In 20
17 years I've never had a case with this much evidence at a motion
18 for conditional certification stage. Typically two months
19 after the case gets started, the plaintiff will file maybe an
20 affidavit and have some evidence or allegation of an inference
21 of a violation, and the Court has no other evidence to look at.
22 So of course, the Court has to grant conditional certification,
23 because there is no evidence to rebut.

24 Here we did six months of discovery. So be careful
25 what you ask for. And now we have a complete record. We have

1 three depositions from Sloane. We have time sheets. We have
2 payroll -- we are not the just looking at pay letters anymore.
3 And this hogwash about a guarantee has to be in writing is
4 absolutely not true, and I'll go there next.

5 And I'll go to the case that Mr. Jones cited to you
6 which does not say what he says it says.

7 THE COURT: I want you do that, but answer this first.

8 MS. IDALSKI: Sure.

9 THE COURT: What if Gulf Interstate gave him a
10 holiday; does that make a difference then as to the day rate
11 and salary basis dispute? So hypothetically, they give him a
12 holiday; does that make a difference between the day rate and
13 salary rate dispute, which I think everyone agrees is probably
14 the heart of this.

15 MS. IDALSKI: No, Your Honor, I don't think it does.
16 The bottom line is he was going to get paid for seven calendar
17 days per week; whether it's a holiday, whether he worked it or
18 not, he's getting paid. It just so happens here that this was
19 not a holiday. It's not July 4th. It's July 5th. It's a
20 Saturday. So there is no evidence in the record that this was
21 a holiday. But no, it would not matter.

22 THE COURT: Go right ahead.

23 MS. IDALSKI: So the bottom line is, you know, then
24 every employer in the country would be crucified then on --
25 just like you said, there is no requirement that a guaranteed

1 salary be put in writing. And Judge Sargus is absolutely
2 right. It's not what the pay letters say. It's what was
3 actually paid. That's what the regulations say, too. It's the
4 compensation received that the court should be looking at.

5 In fact, we cited to some cases, and I'll go through
6 them, where courts say you know what, I don't want to look at
7 your letter, I want to know what this guy actually got paid.
8 Show me the payroll. Did you notice in the three to four hours
9 that Mr. Jones gave his argument, not once did he mention
10 payroll? Not once. That's what we use to prove these cases.

11 Let me just point out, too, because we went round and
12 round what is a day rate, what is a salary, what is a day rate,
13 what is a salary. The key case that the Plaintiff cites in
14 their briefing is this Fenley case. It's a United States
15 District Court Southern District of Ohio, Fenley versus Wood
16 Group Mustang, where Mr. Jones's co-counsel Shannon Carson, and
17 Ms. Piazza's firm, were able to get the court to grant
18 nationwide certification on a day rate case.

19 So they present that to you and say Judge, this case
20 is exactly like ours, see, we got nationwide certification in
21 Ohio on this Fenley case. You should do the same here. This
22 is a real day rate case. We have an exemption case here. We
23 have a salary. In the Fenley case, okay, which this was really
24 a day rate case, Your Honor, this is what you would have, and
25 you would grant nationwide conditional certification.

1 And I'll read from the court's order. "WGM's overtime
2 and additional compensation policy states that, quote,
3 non-exempt, day rate Mustangers receive a day rate that is
4 inclusive of all hours worked including overtime." That's
5 their policy. The day rate is inclusive of overtime. That's a
6 violation of the law. You can't have day rate and not pay
7 overtime. That, on its face, you can draw an inference that
8 this was a policy that was applied nationwide to these people,
9 and therefore, the court granted certification.

10 I don't know what we are missing. Since this case
11 got started a year ago, our client is paying a salary. I mean,
12 this poor company has just been dragged through the mud in two
13 pieces of litigation here. This is now the second bite at the
14 apple and our second argument here, and the case was
15 transferred.

16 They are paying a salary. They're doing everything
17 right. We're not asking you to make a merits decision. And
18 Mr. Jones is right, you can't make a merits decision at this
19 point in time. But you also can't ignore the evidence. The
20 Court has to be comfortable that there's an inference of a
21 violation of the FLSA with respect to pay.

22 All the Court has in front of it is a pay letter,
23 quite frankly. And I'm going to go through these, too, because
24 this is important for the Court to see. And stop me if I'm
25 doing too much here. In their briefing they don't even talk

1 about Sloane's pay letters; except in a footnote, and they use
2 Mr. Hinkle, because Mr. Hinkle is like the Ohio case, which
3 says day worked.

4 Mr. Sloane's pay letters say guaranteed day.
5 Guaranteed. There is seven calendar days and then guaranteed
6 per day. Well, because that sounds like a salary, counsel
7 doesn't want to use those letters as examples to the Court. We
8 went through this in detail with Judge Fischer.

9 So there is no violation of a pay policy in this case.
10 Period. End of story. We don't even have to get into job
11 description, which, by the way, counsel did not present any
12 evidence on whatsoever, unlike Ohio, on job descriptions.
13 There is no evidence as to what Sloane did in the motion for
14 conditional certification or that Sloane's job duties on the
15 compression station are anything like all of these other
16 nationwide inspectors who are on pipelines. None. Didn't
17 argue it at all.

18 So it should be a very easy decision for the Court,
19 given the mountain of evidence that we have, because counsel
20 wanted discovery before they filed these motions, which we
21 fought. But we have been through now six months of discovery.
22 It's been over a year and a half. And the Court has a mountain
23 of evidence to look at.

24 And Mr. Jones wants to argue about whether or not we
25 have a guarantee and thinks that it should be in writing with

1 no authority to say that. So because of that, Your Honor, you
2 should send out notice to 2,000 employees nationwide. This guy
3 is a three-time felon who made \$140,000 a year and worked for
4 this client for six months. And we're having to go through
5 this. I mean, this is -- it's a miscarriage of justice. It's
6 a miscarriage of justice.

7 And with all of the evidence in front of it, I don't
8 see how plaintiff's counsel can argue and be intellectually
9 honest about this argument, honestly, with this kind of
10 evidence. When you've got a time sheet where his own
11 supervisor knew he was paid a guarantee and changed it and sent
12 it into payroll, and the guy was paid every single calendar day
13 that he worked for this company. And we're saying that this is
14 a day rate? There is absolutely no evidence. No evidence
15 whatsoever.

16 So if you look at Sloane's -- you already pointed this
17 out, Your Honor. He made the exact same amount every single
18 week, except for the first week and the last week, which under
19 the regulations he does need to be paid for days he did not
20 work during the first and the last week, and that is why he was
21 not paid \$5,404.

22 Here's an e-mail from Sloane that came out in
23 discoverly. "Karla, I do not believe I was notified of this.
24 I will try to get it done on Sunday, my day off." Admits he
25 had a day off. Got paid for every Sunday. But oh, he was

1 doing paperwork. How did Gulf know he was doing paperwork?
2 They paid him for every single day. "We have been working 12
3 hour days, and I've had one day off in the last six weeks."
4 Admits he had a day off. He was paid for every single day,
5 regardless if he worked or not. That is a salary.

6 Okay. So our chart, and you may have mentioned this
7 earlier, but there were days where he only worked five days at
8 the actual compressor station, or six days. And if he was
9 really paid a date rate, he would have been paid for those five
10 days or he would have only been paid for six days. But he was
11 paid for seven days, no matter what.

12 But counsel is saying because we didn't put it in
13 writing, like counsel wants it to be, we should have just used
14 that one word guarantee pre-2014, and because we didn't, then
15 notice should go out to 2,000 people.

16 So at this point, Your Honor, courts have found that a
17 salary basis can be inferred, and we have cited several cases
18 for you finding a salary and not a day rate when the number of
19 days plaintiff worked varied from week to week but their pay
20 did not. "Plaintiff falls short of demonstrating that she was
21 not paid on a salary basis. She does not allege that
22 Guardsmark docked her pay. To the contrary, her pay slip for
23 the week showed that she was paid for full salary by the
24 company."

25 This is a good time to bring up what Judge Sargus had

1 in front of him. Unlike you, Your Honor, Judge Sargus,
2 actually had evidence where he could conditionally certify a
3 partial class because judge -- at the time Judge Sargus was
4 sitting where you are and was considering this motion, no
5 discovery had been conducted, and the only thing he had were
6 three pay letters that were exactly the same. The three
7 plaintiffs worked on the same project and had the same pay
8 letter.

9 We don't have anyone who had the same pay letter as
10 Sloane in evidence. There is nobody that has pay letters like
11 Thomas Sloane. Okay. And I'm going to show you all the pay
12 letters in a minute to compare.

13 THE COURT: Let me ask you this. That e-mail may be a
14 critical document. Does the Court have that by way of an ECF
15 filing?

16 MS. IDALSKI: Yes.

17 THE COURT: Maybe your co-counsel could -- Mr. Hall?

18 MR. HALL: Yes, sir.

19 THE COURT: Yes. Maybe you or Ms. Saltz can locate
20 that and just make me a reference. That was interesting to see
21 that.

22 MS. IDALSKI: Okay, Your Honor. Let me finish Judge
23 Sargus, and then I do want to come back to the July 5th
24 admission and also that e-mail. You made me think of something
25 else I wanted to bring up.

1 Not only did Judge Sargus have these three pay letters
2 that were exactly the same, okay, but he also had affidavits
3 from the three plaintiffs in Ohio and the affidavits stated
4 that -- the plaintiff testified that there had been an improper
5 deduction, that there had been deduction for sick time when
6 there was no sick policy.

7 So Judge Sargus is now faced with okay, I have three
8 pay letters that are all the same, and they are all alleging an
9 improper deduction, and they all allege they perform the same
10 job duties. So what Judge Sargus did is he conditionally
11 certified just that MarkWest Ohio project. He didn't have the
12 benefit of any other discovery or evidence or admissions like
13 we have in this case. But there was no evidence of a
14 nationwide similarity in pay letters or allegations of improper
15 deductions.

16 You don't have that, Your Honor. You are looking at
17 Thomas Sloane. You have -- quite frankly, they attached the
18 pay letters to the brief, but they only mentioned Sloane's pay
19 letter in a footnote. They focused on an opt-in, Hinkle. I'm
20 not sure why he's not the benchmark for the analysis. It's
21 Sloane. But we have no one who has a letter exactly like
22 Sloane. And Sloane, as far as we all know, was paid for every
23 day that he worked.

24 So who is similarly situated to Sloane? We don't have
25 anybody. Plaintiffs have not shown anyone who was similarly

1 situated to Sloane with respect to pay. Sloane was paid a
2 salary. I'm not sure what else we can do to prove that Sloane
3 was paid a salary.

4 Going to the slide about guarantees.

5 Guarantees need not be written. Okay. ACS versus
6 Detroit Edison Company, where the Sixth Circuit said, "Finding
7 guarantee, even though there was no writing, based would be
8 affidavits and deposition testimony by relevant employees of
9 the company, along with various employees time keeping forms,
10 paystubs, and payroll department reports."

11 Exactly what we have in this case.

12 "Plaintiff offers no legal support for the proposition
13 that the uncontested evidence contained in these depositions,
14 affidavits and documents does not suffice to satisfy an
15 employer's obligation to show its eligibility for the
16 executive, administrative or professional exemption."

17 The case that Mr. Jones cited to you with respect to
18 the teachers, Rodgers versus Basin School District, the
19 plaintiff claims that this case requires that the guarantee be
20 in writing. And it does not. Here's the quote from the case.

21 "The Court's determination flowed from the employee
22 agreement and district policy 471, which identified plaintiff
23 as a non-certified employee. And as such, under the master
24 agreement, such employee's salary schedules are paid hourly."

25 That's what that case says. That case does not say

1 that you have to have a guarantee in writing. And you don't.
2 And the Court was right about that.

3 All right. Now, let me go back to Mr. Sloane. And
4 the Court brought up the fact that there was -- that Mr. Sloane
5 had a criminal past. And we mentioned in our briefing that --
6 in fact, we filed the motion to dismiss early on, because we
7 didn't think that he was an adequate class representative. And
8 Judge Fischer wanted to give the plaintiff a chance, because he
9 said that he -- you know, he was a changed man and he had a
10 alcohol and a drug problem and that he was no longer that
11 person. So she have did give him the benefit of the doubt.
12 Didn't want to dismiss the case early on.

13 And you know, if that's true, then he would be honest
14 in this litigation, if he's a changed man. And if he's not
15 honest, then we thought we would bring it up again at the Rule
16 23 motion with respect to adequacy.

17 So during Sloane's second deposition he gave
18 inconsistent testimony about July 5th. Mr. Hall asked on
19 June 22nd, 2016, "Did you work on July 5, 2014? Answer,
20 July 5th 2014? Question, Yes. Answer, Yes. Question, Where
21 did you work on July 5th? Answer, At home. Question, What did
22 you do when you were working at the apartment on July 5th?
23 Answer, Reports and stuff, going over drawings."

24 Then on September 25th, 2016 his answer changed, and
25 this is when he said he did not work on July 5th. So we have

1 conflicting testimony there on probably one of the most
2 critical pieces of evidence in this case.

3 There's a couple of other points I want to just hit,
4 Your Honor, for you. And then I didn't show you Randy Groves's
5 declaration. This is the supervisor of Sloane. He's the chief
6 inspector on the 319 project. He knew that Sloane was to be
7 paid a guaranteed salary. And he submitted the declaration
8 testimony here. He's familiar with how GIFS inspectors on that
9 project, including Mr. Sloane, were paid.

10 "Mr. Sloane received a guaranteed salary each week
11 that was calculated by taking a certain set amount and
12 multiplying it by seven days. Mr. Sloane was paid that full
13 salary whether he worked all seven days during the week or not.
14 There were a number of weeks during the Station 319 project
15 when no work was done on Sunday.

16 "Because the inspectors were guaranteed seven days'
17 pay each week, however, they got the full amount of salary even
18 in weeks where we did not work on Sunday."

19 And you have Mr. Groves intercepting Mr. Sloane's time
20 sheet and then changing it and sending it to payroll. And
21 that's how the process worked.

22 THE COURT: Again, that declaration, Groves's
23 declaration, is that part of an ECF filing?

24 MS. IDALSKI: Yes, it is.

25 THE COURT: If you would point that out to me at some

1 point.

2 MS. IDALSKI: Sure. And the e-mail you asked me about
3 is document number 182-18. It's an exhibit to Sloane's
4 deposition.

5 So one thing we haven't talked about today is what
6 standard applies at the motion for conditional certification
7 stage. It is the defendant's position that the lenient
8 standard no longer applies. The case law is pretty clear on
9 that.

10 Judge Sargus applied the lenient standard because no
11 discovery was conducted. At that point if -- that's why
12 95 percent of the time when plaintiffs file these motions for
13 conditional certification they are filing them before
14 discovery, shortly after their complaint. And 95 percent of
15 the time courts routinely grant them. Because there is such a
16 lenient standard, we have to go based on what the plaintiff is
17 saying.

18 Now, okay, but if discovery is conducted before filing
19 the motions, a more stringent standard applies. So again, it's
20 a be careful what you ask for situation.

21 And here, we have even -- initially we had the
22 payroll, which showed that Sloane received the same pay every
23 day, every calendar day. And during the six months of
24 discovery after deposing him several times, because of
25 withholding documents and the like, that's why there were three

1 depositions, he made some pretty critical admissions.

2 So plaintiff's counsel would have you ignore all that
3 evidence and focus on the fact that there is not a guarantee in
4 writing. And because there's not a guarantee in writing, and
5 because it seems odd that Cathie Kramer would not have
6 something in waiting in the payroll department, therefore, the
7 Court should make an inference of an illegal FLSA policy with
8 respect to pay, which Your Honor, that's just preposterous in
9 light of all of the other evidence that points to the fact that
10 this man received a salary.

11 So here we had 17 declarations. I believe they are
12 all in evidence. We had six depositions of Cathie Kramer, Bob
13 Sprick, who is here today, the vice president -- the senior
14 vice president. We had Andy Neuberger and we had Sloane's
15 three depositions. We had a total of six months of
16 precertification discovery and more than 11,000 documents
17 produced between the parties.

18 We had none of that in your typical conditional
19 certification motion when the motion is decided.

20 So what level is evidence is required? We're past the
21 modest factual showing. And most courts -- we cited to the
22 Creely case, which actually has a good analysis from the
23 court -- several different courts as to what should the
24 standard be at this point. If there is extensive discovery
25 conducted, the plaintiff has to make a modest plus factual

1 showing, not just a modest showing. And courts are pretty
2 clear on that. We're not at the preponderance of the evidence
3 standard.

4 The court did bifurcate discovery. Judge Fischer did
5 bifurcate discovery. But quite frankly, so much discovery was
6 conducted in the last six months I'm not sure if there is any
7 necessary discovery necessary to be done conducted going
8 forward. I think the factual record is complete. It appears
9 to be, for the most part, complete.

10 So courts say look, we're not going to ignore
11 evidence. If you did discovery, don't come in and tell us that
12 we should grant your motion based on affidavits. It would
13 be -- you would have the absurd result of granting the parties
14 time of due discovery on the conditional certification question
15 but subsequently imposing no incremental hurdle in determining
16 whether plaintiffs may send opt-in notices.

17 The court should compare plaintiffs allegations set
18 forth in their complaint with the factual record assembled
19 through discovery to determine whether plaintiffs have shown
20 some progress as a result of the discovery as measured against
21 the original allegations and defenses. How much the progress
22 plaintiffs have made will be considered in conjunction with
23 defendant's evidence.

24 So the court can't ignore the evidence in the record.
25 It has to look at plaintiff's evidence and defendant's evidence

1 in drawing its conclusions. So we have several courts listed
2 here that have imposed this higher burden when discovery is
3 conducted.

4 And the other point I wanted to make, but I think I
5 have already made it, is that this is an exemption case. It's
6 not a day rate case. Fenley is a day rate case. Where
7 everybody agrees that a day rate was paid, that on its face it
8 appears to be potentially illegal, because you can't have
9 overtime included in a day rate, generally, unless you have a
10 below contract, and that is in writing.

11 But generally, that's the kind of policy you see in a
12 day rate case when courts are conditionally certifying them.
13 You don't see a salary and the plaintiff wanting to turn the
14 salary into a day rate based on the assertion, the just absurd
15 assertion, that the guarantee has to be in writing. Because
16 it's not in writing, therefore, it must be a day rate. And
17 it's defendant's burden to show because it's not in writing
18 they actually paid a salary. That's not the standard. And
19 that's not the burden of proof on a motion for conditional
20 certification. So I'm not going to go through that.

21 But the question for the Court today is has Sloane
22 carried his burden of showing that he is similarly situated in
23 terms of both pay and job duties when there is no evidence of a
24 uniform, potentially unlawful pay practice. If Sloane can't
25 show an inference -- he doesn't have to prove it -- but an

1 inference of an unlawful pay practice as to himself, how is he
2 going to show it with respect that he is similarly situated
3 with respect to the class? We don't even get there. We're not
4 even close to getting there.

5 Then with respect to job duties, we have no evidence
6 of Sloane, who worked on a compressor station not a pipeline,
7 that he did the same job duties as this nationwide classes of
8 all different types of inspectors. We have no evidence
9 whatsoever in the record on the motion for conditional
10 certification.

11 The only argument you heard today, Your Honor, was
12 Mr. Jones telling you what the Department of Labor regs say
13 generally about inspectors, not even pipeline inspectors but
14 generally inspectors are not exempt employees based on their
15 job duties, is what he was telling you. But he has to do more
16 than that.

17 He actually has to show that Sloane -- you have to
18 look at the facts in this case, not in talking in general
19 terms, but look at the facts of this case and show how Sloane's
20 job duties are similar to the class that he seeks to represent.
21 We have heard no evidence on that at all.

22 In fact, there was such an absence of evidence that
23 Judge Fischer issued an order for defendants to produce job
24 descriptions prior to our hearing. Okay. And so defendants
25 did produce job descriptions and plaintiff said -- Mr. Sloane

1 said I didn't do these duties. GIFS came up with those job
2 descriptions after this case began, and all of those job duties
3 listed are really exempt job duties and I'm not going to agree
4 that I performed them. Okay.

5 So you can't have it both ways. So there's no
6 evidence that he performed job duties like anyone else. He has
7 not met his burden of proof; far from it at this stage.

8 I'm just going to skip through some of these slides
9 that we have already covered today. The Court is well aware
10 that salaries can be computed on a daily basis. Mr. Jones even
11 discussed that.

12 So what we have in this case, like I said, and never
13 had this much evidence at a motion for -- on a motion for
14 conditional certification, on the defense side as we have here.
15 It's just absolutely overwhelming.

16 THE COURT: Let me ask you this, if I may.

17 MS. IDALSKI: Sure.

18 THE COURT: Did Gulf Interstate ever pay its workers
19 overtime?

20 MS. IDALSKI: No, it did not, except for in
21 California. They're treated differently.

22 THE COURT: Were there discussions as to overtime
23 being included in the day rate, as you might have in Fenley,
24 for example?

25

1 MS. IDALSKI: No. At all times Gulf Interstate paid
2 their inspectors a salary calculated by the day. And that's
3 what the evidence shows in this case. The deposition of Bob
4 Sprick clearly shows that. He goes through, and in
5 excruciating detail, that these inspectors were always paid a
6 salary, that's it's calculated by the date.

7 Cathie Kramer's deposition specifically states that.
8 And one 'gotcha' that the plaintiffs have -- Plaintiff Sloane
9 has pulled out here is Cathie Kramer saying -- again, it's
10 semantics. She was explaining how the salary is calculated by
11 the date, and she said the word day rate. So you'll see that
12 quote out of context. Mr. Jones brought that up today. And
13 you'll see it in the briefing. But we have the whole clip
14 here.

15 But if you read Ms. Kramer's deposition, it clearly
16 states that these individuals -- how they were paid. They were
17 paid a salary. It was guaranteed. It was calculated by the
18 day.

19 So what you have, Your Honor, it is the timing, plus
20 the evidence clearly shows that the Court should reject this
21 day rate myth. The evidence that we have are the payroll
22 records, the time sheets, Sloane's three deposition
23 transcripts, the deposition of GIFS executives and 17
24 declarations between the parties. We have payroll and time
25 sheets showing same pay every week, regardless of days works.

1 We have Sloane's testimony. He had days off but he's
2 still paid. We have supervisor testimony where the supervisor
3 is changing the time sheets to reflect the guarantee. I mean,
4 honestly, I don't know how much more evidence we can have in
5 this case.

6 Here is a -- Sloane's pay letter, his April 11th, 2014
7 pay letter. It shows that we have highlighted salary. Okay.
8 That's right on his pay letter. It says salary. And then it
9 says \$386 per calendar day. Okay. I know Mr. Jones pointed
10 out, as approved by the client. And Mr. Sprick testified, you
11 know, exactly what that meant in his deposition.

12 But the bottom line is Mr. Sloane, if you look at the
13 payroll, was paid for every single calendar day and he was paid
14 a salary. So there is nothing inconsistent about this.

15 And the Court understands the calculations, so I won't
16 go through that.

17 You can't look at these letters in a vacuum. You
18 should look at the payroll. Again, as plaintiff won't mention
19 payroll in all of their briefing and all of their argument,
20 even though, as Judge Sargus said, and Judge Sargus did get it
21 right, and The Sixth Circuit, is very clear on this, it's the
22 payroll. It's the evidence of how they were actually paid that
23 matters, not a letter or not some other extraneous evidence.

24 Now, Judge Fischer also pointed out in her last
25 opinion to -- when she was transferring the case -- that some

1 of the time sheets that Sloane submitted indicated he worked
2 less than all seven days during a particular week, Gulf made
3 adjustments to those time sheets prior to sending them to
4 Kinder Morgan, reflecting that he worked ten hours every day
5 that he was assigned to the client. Which clearly, she
6 recognized look, we ensured that this guy was being paid the
7 same amount whether he worked or not.

8 And we have Sloane's testimony, which I have already
9 gone through, where he had days off where he didn't work where
10 he was still paid. Typically what you would see in this case
11 is the plaintiff saying employer, I wasn't paid a salary. You
12 took all of these deductions from my paycheck. Now, I wasn't
13 paid for all of these days when I was off. If I was really
14 receiving a salary, I would be paid the same amount every week
15 and you wouldn't be deducting from my pay, and then the
16 plaintiffs' attorneys attach the payroll or the pay stubs or
17 the time sheets to their complaints. And that is some evidence
18 of an inference of a possible unlawful deduction where you
19 would grant a motion for conditional certification.

20 Again, this is not that case. We don't have that
21 here. So what you do have is you have uniform testimony of a
22 salary. You have uniform testimony of a legal pay practice.
23 What Mr. Jones and the plaintiff have to show is that there is
24 uniform testimony of an illegal pay practice, that there's an
25 inference of an illegal pay practice with respect to Mr. Sloane

1 and that similarly situated to other class members who also
2 have a potentially -- are subject to a potential illegal pay
3 practice.

4 We have the opposite here. We have everybody
5 testifying to a legal pay practice.

6 Mr. Sprick, who is senior vice president, "At all
7 times it has been, and it is GIFS's practice, to pay its
8 inspectors a salary based on a set amount multiplied by a
9 guaranteed number of days per week. This guaranteed salary is
10 explained to each inspector upon his or her hire with GIFS in
11 both a pay letter and a discussion with the inspector. Client
12 approval of a time sheet is not a prerequisite to an inspector
13 being paid his or her guaranteed salary."

14 Andy Neuberger. "Whatever the number of days is, all
15 inspectors, other than those working on the three projects that
16 we had identified, one of which was California, Gulf
17 Interstate's position is that they are paid a guaranteed number
18 of days per week. They are paid a salary based on a guaranteed
19 number of days."

20 Cathie Kramer. "It's based on a guaranteed daily
21 structure. The pay structure is per day for a guaranteed
22 number of days per week. It's a guaranteed amount per week.
23 It's based upon a guaranteed number of days per week. We have
24 a rate that we pay them by day times a number of days in their
25 guarantee, per their pay letter. It is a guaranteed amount

1 structure by days. They're both -- they are both guaranteed
2 for seven days. It's a weekly rate."

3 Mr. Jones asks, "It is stated as so much per day in
4 the pay letter. Correct? Answer, For seven days a week, which
5 equals a weekly rate."

6 I'm not sure what more Cathie Kramer can say.

7 In addition to all of the evidence in this case, we
8 have evidence from the Hughes case. So we already have one
9 district court judge saying yes, I have looked at the payroll;
10 these people are being paid a salary, the payroll is what
11 controls. Not only did he not grant a conditional
12 certification on a nationwide basis, but he refused to grant
13 the class certification under Rule 23. And then he granted
14 summary judgment that these individuals are paid a salary.

15 I know this is not before this Court right now but the
16 Court again can't ignore the evidence. I mean, there's comity.
17 The Court has to -- you know, it's before the Court. And all
18 of this should be taken into consideration.

19 So again, and I know we are beating this to death, but
20 I know we had a lot of discussion on it. If you have a day
21 rate, okay, you have weekly pay that would fluctuate. That's
22 the whole point. You don't get paid for days that you are not
23 there.

24 The actual evidence here is we have the same pay every
25 week. Again, we're only looking at Sloane. Is everyone

1 similarly situated to Sloane. If there were day rates, Sloane
2 would have testified he wasn't paid for days he worked. Here
3 he admits that he was paid even when he worked. Okay. So
4 that's our actual evidence.

5 If there were a day rate, the supervisor would not
6 change Sloane's time sheets from six days to seven days worked.
7 Okay. Here, we have a supervisor actually going in and
8 changing this time sheet because he knows that his inspectors
9 all have a guaranteed amount of pay. If there were a day rate,
10 you wouldn't have every -- all of the supervisors at GIFS
11 saying that we have a guaranteed salary here. So you've got
12 uniform testimony from the supervisors.

13 Hall versus Guardsmark. This is a Western District of
14 Pennsylvania case. "Court does not review plaintiff's evidence
15 in a vacuum. It reviews plaintiff's evidence in light of the
16 evidence submitted by defendants."

17 All right. So plaintiff's whole case ignores all of
18 this evidence. And they focus on select pay letters. And
19 Mr. Jones didn't show you any of these pay letters today. But
20 in the briefing this is what the plaintiffs argue to the Court.
21 And in our hearing before Judge Fischer, we talked about these
22 pay letters.

23 And I think they are important for the Court because,
24 you know, Your Honor, it's correct you can't make a merits
25 decision right now, even though you probably could because you

1 have so much evidence.

2 But what you are to do, according to the case law, is
3 to say okay, first, is there an inference of a violation of the
4 FLSA. And second, is this individual, Sloane, similarly
5 situated to other employees, based on pay letters, based on how
6 he's being paid, based on the job duties that he's performing.

7 So here, what we have is -- and we'll go through these
8 pay letters, and we also have hard copies for the Court, if the
9 Court would like them. Sloane selected certain pay letters in
10 his briefing. And he focused all of his argument on Hinkle's
11 pay letter, not his own. The reason is because is Hinkle's pay
12 letter looks more like a day rate than Sloane's pay letter. So
13 he presented the -- the plaintiffs presented only half of
14 Hinkle's pay letters, though, and then they ignored the other
15 half. So they cherry picked out the evidence that looked more
16 like a day rate. We're trying real, real hard here to show
17 that there is some kind of day rate, like in February in
18 Fenley. This is not that case.

19 The plaintiffs ignored any opt-in letters and didn't
20 present them in their argument to the Court. They attached
21 some of them, not all of them, that had a guarantee, that said
22 anything about a guarantee.

23 So what you have is Hinkle's pay letter here on the
24 screen; August 13th, 2012. It says salary \$267, day worked.
25 Sloane's pay letter says, salary \$387, calendar day, as

1 approved by client. So what sounds more like a day rate?

2 Calendar day or day worked? Well, day worked does.

3 So let's present Hinkle's pay letter. But this is not
4 a case about Hinkle. Hinkle is just an opt-in at this point,
5 and he's not the benchmark. Sloane is the benchmark. But this
6 proves that they don't have common pay letters. You've got
7 different rates and you have got different projects. They
8 didn't work on the same projects. They didn't have the same
9 supervisors. They don't have the same rates. One says day
10 worked. One says calendar day.

11 If you look at Hinkle's pay records, though, which
12 were produced during discovery, that plaintiffs insisted that
13 they needed to have but never brought them up in all of their
14 briefing or in argument, he was paid the same amount every
15 week, which also shows that it looks like he's been paid a
16 salary. He's been paid a guaranteed amount, just like the
17 supervisors testified would be the case except for the first
18 week and the last week.

19 So here is another pay letter that was produced by the
20 plaintiffs, \$362 for day worked. This was March 3rd, 2013. If
21 you look at payroll again, even though it says day worked, it
22 looks an awful lot like a salary. It's the same amount every
23 week. All right. Plaintiff's selective pay letter number
24 three, October 24th, 2013, \$419.95, day worked.

25 You look at the payroll records and he's paid pretty

1 much the same amount every week unless he worked more days.
2 Then he is paid more. There were some time off for the
3 Christmas holidays. The regs say that if someone is out for a
4 week or more, they don't need to be paid. These are all lawful
5 deductions, the ones that are shown because he was not there.
6 That is what plaintiff shows you; not the payroll, just the
7 select payroll pay letters. They don't talk about Sloane's pay
8 letters again. They talk about Hinkle.

9 So if you look at the whole truth, we've got Hinkle's
10 pay letters omitted by plaintiff. Okay. If we're going to
11 show Hinkle's pay letters, why not show all of the letters?
12 Well, because one says guarantee and we wouldn't want to have a
13 guarantee because that looks too much like a salary. So we're
14 only going to present half the story to the Court.

15 It says, fixed salary \$348 a day, guaranteed six days
16 per week. Another letter that was omitted from Hinkle. Fixed
17 salary, \$355 a day, guaranteed five days per week. Another
18 letter for Hinkle that was omitted by the plaintiff, fixed
19 salary, \$355 per day, five days per week.

20 As you can see, Your Honor, these pay letters are all
21 over the place. Even if you don't consider the fact -- if you
22 want to ignore the payroll, like plaintiffs want you to, even
23 if you were to just consider these letters, they're not the
24 same. They are not the same. They're all different. Some are
25 guaranteed. Some are guaranteed five days a week. Some of

1 them are day worked.

2 Judge Sargus had the exact same pay letters for those
3 three plaintiffs on the MarkWest project, and that's why he
4 conditionally certified that class. And he had the deductions
5 argument.

6 You have no evidence in front of you of any common pay
7 practice of anything that Sloane is similarly situated to any
8 of these opt-ins. There's five opt-ins. This is Hinkle.

9 Not to mention -- I don't even think we get there,
10 because we haven't established an inference of an illegal pay
11 practice in the first place with respect to Sloane. Because
12 now there is too much evidence that you have to look at because
13 of all of the discovery that was done in this case.

14 So the whole truth is now we look at opt-in
15 Stapleman's pay letters. Okay. His pay letters say -- and
16 these were not mentioned in the briefing of the plaintiffs --
17 that he received \$446, guaranteed seven days per week; \$337
18 based on a seven-day workweek; 330 based on a seven-day
19 workweek. These weren't mentioned because one clearly says
20 there you go, you want to have a guarantee in writing, there
21 you have it with Stapleman, guaranteed seven days per week.
22 Seven-day workweek, that looks like a guarantee. As you can
23 see, all of these pay letters are different.

24 If you don't believe, which is not even the right
25 standard here, they are not the same. All the pay letters are

1 different.

2 Stapleman's pay letters again, here they are. Each
3 one that I just went over. LaLonde, his pay letters, they all
4 say guaranteed. He's one of their opt-ins. He's guaranteed --
5 if anything, he received a guarantee like Sloane. So they do
6 have a guarantee which means they are being paid a salary,
7 which means there is no illegal pay practice. So the ones that
8 are similar have a guarantee and there is no illegal pay
9 practice.

10 So plaintiffs just -- there is too much evidence now.
11 They can't -- it's too late for conditional certification on a
12 lenient standard. We have to look at all of the evidence now.
13 And all of this evidence points to the fact that there
14 shouldn't be conditional certification. It would be a travesty
15 to send out notice to 2,000 people, or five people for that
16 matter, in light of this kind of evidence.

17 Here are the pay letters. Guaranteed five days a
18 week, LaLonde. Guaranteed five days per week, LaLonde.
19 LaLonde, February 11th, 2015, 425 per day up to 12 hours,
20 guaranteed five days per week. 42.50 is an additional
21 compensation over 12 hours, as approved by the client. \$400 a
22 day up to 12 hours, same thing. This is June 2nd, 2015. Okay.

23 So Sloane's pay letters have a guarantee confirmed by
24 payroll. We have two letters for Sloane; the April 11th, 2014
25 pay letter provides for pay every calendar day, as approved by

1 the client. Calendar days are as guaranteed as the sun coming
2 up. Client approval was not a day-to-day approval but merely
3 overall control of the project.

4 Sloane's June 17th, 2014 pay letter contains an
5 express guarantee. Being at the job site meant being in
6 Wyalusing, and it did not mean going to the trailer. Sloane
7 was paid for numerous days that he did not go to the trailer.
8 Here is Sloane's June 17th, 2014 pay letter, which is in a
9 footnote in plaintiff's briefing on the motion for conditional
10 certification.

11 There's a lot of discussion about pay letters. Okay.
12 If that's all we had to go on, and they were all the same, and
13 they didn't say guarantee, and there was no other evidence,
14 maybe you would do what Judge Sargus did. But at the end of
15 the day, that's not what you have in front of you now. And we
16 know that Judge Sargus has ruled, it's not written descriptions
17 of the payment policies that were relevant to the salary basis
18 test inquiry but rather the actual payment practice. Here,
19 there is no dispute that plaintiffs were actually paid the
20 requisite amount to satisfy the FLSA's salary-basis
21 requirement.

22 So we have no one who is similarly situated to Sloane
23 in terms of pay. Similarly situated means that one is
24 subjected to some common employer practice, that, if proved,
25 would help demonstrate a violation of the FLSA. It doesn't

1 mean that there's a common practice that if proved is legal,
2 like a salary.

3 So Sloane can't show any part of the standard. He was
4 paid a salary. He admits he was paid for days he did not work.
5 The payroll records show the same pay every week. We don't
6 have any evidence of a common practice that would violate the
7 FLSA.

8 So at the end the day, Your Honor, what you are left
9 with is this allegation of a day rate policy that Mr. Jones
10 said that the guarantee should have been in writing, is
11 required to be in writing, with no authority to back that up.
12 And that this case is going to rise and fall as to whether or
13 not the jury believes Cathie Kramer. That's the evidence that
14 he has presented to you today.

15 The District of New Jersey denied conditional
16 certification under similar circumstances finding, "No factual
17 basis to support the inference that employer has the company
18 policy that plaintiff claims. Plaintiff provides no factual
19 foundation for his statement that employer policies mandated
20 that loan officers not be paid overtime. This appears to be a
21 conclusory allegation and in the absence of any supporting
22 factual assertions, it does not allow this court to infer the
23 in existence of a company policy that would be expected to
24 result in a class of similarly situated loan officers."

25 Okay. So that's what we have with respect to pay.

1 You have nothing. Nothing was presented to you today that
2 would allow you to be able to infer that there is a violation
3 of the FLSA with respect to Plaintiff Sloane. What we have
4 here is we have a salary basis. And again, I don't know how
5 much more evidence we can have.

6 In addition, Mr. Sloane has to show that he was
7 similar with respect to the class with respect to job duties.
8 And what we have here is the motion -- there was not an
9 affidavit attached to the motion for conditional certification
10 with respect to the job duties that Sloane performed. Okay.
11 Again, Sloane's different. He's at a compressor station. He's
12 doing something totally different.

13 And so that was their choice to ignore job duties.
14 They argued DOL regulations. They have argued generally that
15 inspectors shouldn't be exempt. That's not enough. Judge
16 Fischer saw that there wasn't anything there and ordered job
17 descriptions, which we were shocked that she was actually
18 trying to help the plaintiffs. Then they disavowed the job
19 descriptions.

20 Okay. So at first, plaintiff said look, we don't have
21 to prove that we have similar job duties. You know, all we
22 need to prove is that there's a day rate. And they were
23 banking on the fact that by using semantics, by using the term
24 day rate, by showing selective pay letters that said day
25 worked, that no one was going to notice. Maybe the Court was

1 going to be too busy, maybe defense counsel was going to be too
2 busy to pick up on it and they would slide on through and get a
3 rubber stamp and get this thing conditionally certified to
4 2,000 people. There was just no evidence, and we argued that
5 in our response.

6 But what you have here, and the Court already said
7 this today, and I just want to reiterate it again, is that
8 these job duties are individualized. What you have is
9 different clients all across the country who are supervising
10 these inspectors. So they have different supervisors,
11 different locations, different clients with different sets of
12 rules. Some of the clients had their own job descriptions.
13 Some are compressor stations. Some are pipelines. They're not
14 similar.

15 You would literally have to -- it is so individualized
16 that you have to look at what each of these people are doing.
17 We don't have evidence like we had in the MarkWest Ohio project
18 where the plaintiffs said we all do the same thing. It was
19 easy for Judge Sargus; they all do the same thing, so at this
20 lenient state, I am going to just certify the MarkWest Ohio
21 project because I have evidence that they are similar on the
22 same project with the same supervisor.

23 The problem with different supervisors, and even
24 Sloane admitted this in his deposition, is that they allowed
25 different levels of discretion and independent judgment, which

1 is one of the things that has to be -- one of the proofs for
2 these exemption. So if you have a supervisory chief inspector
3 and he's never there, and he's going to let you take control of
4 the project, you are going to have more supervision and
5 discretion than maybe some other inspectors.

6 So I mean, that's going to be key here, as well.

7 So there are plenty of courts, Your Honor, that have
8 not granted conditional certification. Okay. We have listed
9 them all. Because I think a lot of courts are so used to just,
10 you know, granting conditional certification, and it does
11 happen most of the time.

12 This is not that case. This is a very unique case.
13 Like I said, in 20 years I have not had a case with this much
14 evidence. It's true most of the time conditional certification
15 is granted. But not here. Not when you have six months of
16 discovery and now the Court -- there is no longer this lenient
17 standard, but there is this modest plus standard, and you have
18 all of this evidence where you can't infer -- there is no
19 proof. There is no inference that can be drawn because it's a
20 clear case of evidence -- okay. We're not asking you to make a
21 merits decision. You have to be careful there. But there's
22 evidence of a salary.

23 And you already have a district judge in Ohio who
24 looked at the exact same issue with the same payroll and is
25 saying they were paid a salary.

1 So you're in a very unique position. This is not like
2 every other case. And we strongly submit to you that you
3 should deny this motion for conditional certification in their
4 entirety, because quite frankly, it's frivolous in light of all
5 of the evidence that we have.

6 Your Honor, that's all I have on the motion for
7 conditional certification.

8 THE COURT: Would you like to talk about Rule 23
9 certification?

10 MS. IDALSKI: Okay.

11 THE COURT: Before we get into that, I think it's an
12 opportune time for a short recess. Why don't we pick up where
13 you left off at about 4:00.

14 MS. IDALSKI: Okay. Great.

15 THE COURT: The Court will rise.

16 (A recess was taken from 3:50 p.m. to 4:03 p.m.)

17 THE COURT: Mr. Hall, you are going to tackle the Rule
18 23 issues?

19 MR. HALL: Yes, sir.

20 THE COURT: Go ahead.

21 MR. HALL: Before we get started on that, though, I
22 wanted to clean up one issue. The docket number for Mr.
23 Groves's deposition, which we showed you in the presentation
24 earlier, is docket number 182-17.

25 THE COURT: Right before the e-mail from Sloane?

1 MR. HALL: That's correct.

2 THE COURT: Thank you.

3 MR. HALL: If it would be of assistance to the Court,
4 we do have hard copies of the pay letters for Mr. Sloane and
5 the opt-ins. Happy to offer it up.

6 THE COURT: Hand it up to Mrs. Hitesman, if you would,
7 please.

8 MR. HALL: Of course.

9 THE COURT: Thank you. Go right ahead.

10 MR. HALL: Rule 23 certification, Your Honor. Given
11 what Ms. Idalski just showed in regards to Section 216(b),
12 conditional certification, which is a much lower standard, this
13 should be a pretty easy call. Because the plaintiffs are not
14 able to meet 216(b), they are not going to be able to show that
15 they can meet the much higher standard of Rule 23.

16 So the issue here on 23 where there is one
17 certification decision unlike a section 216(b) is have they met
18 their burden of showing. And they do have to show it at this
19 stage, by a preponderance of the evidence, that they have
20 satisfied -- not merely that they can in the future -- but have
21 they now shown that they have satisfied all of the requirements
22 of the 23(a) and 23(b)(3), and in particular the elements of
23 typicality, commonalty and predominance, which are analyzed
24 together in The Third Circuit, and adequacy.

25 So taking each of those first, and I'll go through

1 them in order. First is typicality. Has Mr. Sloane shown that
2 his claims are typical of the class when he was paid a salary
3 but the class claims to have been paid a day rate? No. He's
4 bringing a fundamentally different kind of claim than the
5 class. He is paid a salary. They claim to have been paid a
6 day rate. They're not typical claims.

7 Second, commonality and predominance. Have they shown
8 that common evidence -- and you have cited the language of
9 Wal-Mart versus Dukes -- it's not the raising of common
10 questions but it's the ability to generate common answers. Do
11 we have common evidence that will prove -- that will give us
12 the answers about day rate and job duties for all of the class
13 members in one stroke? And the answer to that question is also
14 no.

15 Individual payroll records, as Judge Sargus found, are
16 what is going to control the issue of question of how was each
17 person paid. They have some pay letters, and we have seen the
18 pay letters differ. So there is no common evidence there. The
19 payroll, in the course of conduct in terms of how the parties
20 actually behaved during the employment relationship, is going
21 to tell us whether it was a salary or a day rate. And we have
22 to look at that individually for each inspector.

23 When you look at it individually for Mr. Sloane, you
24 see that it disproves this day rate theory, because you see
25 that he was paid for days that he did not work. Then when it

1 comes to job duties, they have put some declarations in on job
2 duties at this stage under Rule 23. The problem is those
3 declarations don't answer the question for all class members at
4 once.

5 Because we've put in declarations from other class
6 members who have said my own job duties and the job duties of
7 other inspectors differ from project to project, from
8 supervisor to supervisor, from client to client. So whatever
9 the similarities they have shown, there are differences in the
10 class, and there is no way to get common evidence, answering
11 the question of what are the job duties in one stroke, as would
12 be required for predominance under (b)(3).

13 Then last, Mr. Sloane's adequacy. Has he carried his
14 burden of showing that he is adequate when he is going to be
15 subject to cross-examination on unique issues that are personal
16 to him that will distract him to the detriment of the class?

17 Mr. Jones earlier said well, we feel we can tell the
18 jury that his past criminal history doesn't matter, and we feel
19 like if we can convince the jury that he wasn't lying when he
20 gave two different stories about what he was doing on
21 July 5th...maybe they can and maybe they can't. But that's all
22 time spent focusing the jury on Mr. Sloane individually and not
23 focusing on the claim. That's what makes him an inadequate
24 class representative. At this stage, again, the plaintiff
25 bears the burden of proof.

1 As Your Honor pointed out, the Court does have to
2 resolve factual and legal issues at this stage, to the extent
3 they are relevant to the Rule 23 analysis. That's true, even
4 if they overlap with the merits. So even if the issue you have
5 to decide at Rule 23 is an issue that would eventually, if made
6 on summary judgment or if made in a different context deal with
7 the merits, that's no reason to avoid making the tough decision
8 now and saying, for example, there is no evidence of a day rate
9 here.

10 So when you are looking at Rule 23, you are examining
11 it through the lens of the underlying exemption claims. And as
12 Your Honor pointed out, two different exemptions here. They
13 are different from the FLSA in that under Pennsylvania law
14 there's a long test and a short test. If you make over \$250 a
15 week, which Mr. Sloane, making over \$140,000 a year, clearly
16 was, you go to the short test. And if it were the executive
17 exemption that applies, you ask is his primary duty management,
18 does he customarily and regularly direct the work of two or
19 more other employees.

20 You don't ask the question you would ask under the
21 FLSA, does he have the authority to hire and fire, or are his
22 recommendations with respect to hiring and firing given a
23 particular weight. That's an element in the FLSA that's
24 missing from the Pennsylvania executive exemption.

25 Under the Pennsylvania administrative exemption,

1 likewise. Once you get above \$250 a week, a short test
2 applies. You ask is his primary duty office or non-manual work
3 directly related to the general business operations. It's the
4 same as the FLSA exemption. And then is the primary duty, does
5 that include work requiring discretion and independent
6 judgment. It's missing the language with respect to matters of
7 significance, which exists in the FLSA.

8 So while we have ostensibly executive and
9 administrative exceptions under both the FLSA and under
10 Pennsylvania law, they are not precisely the same, although
11 concededly, they are very, very similar.

12 So in analyzing Rule 23 through the lens of pay in job
13 duties, sort of a dual inquiry under Pennsylvania exemption
14 law, first we ask ourselves has Mr. Sloane shown that his
15 claims are typical of the class. And the typicality analysis
16 focuses on similarity of the legal theory and the legal claims,
17 similarity of the factual circumstances. And then it also --
18 this is where technicality overlaps with adequacy. Is he going
19 to be subject to unique defenses. And I'll address that in the
20 adequacy.

21 But it's also a proper question under the typicality
22 analysis, as well. The answer is no, he has not because his
23 claim is fundamentally different from the classes. He says I
24 was not exempt. But we can see he was paid a salary. Which
25 means he either has no claim at all or his claim is my job

1 duties don't make me exempt.

2 But that's not what the class is claiming. The class
3 is claiming we were paid a day rate. So if Mr. Sloane was paid
4 a salary and the class is claiming they were paid a day rate,
5 these are not legally and factually typical claims, and they
6 have not satisfied the burden under Rule 23.

7 At this point, as Your Honor mentioned earlier, this
8 is where the factual determination of what kind of claim is
9 Mr. Sloane making comes into play. And that question has to be
10 answered in view of all of the evidence that's been presented
11 to date, including the payroll records that show Mr. Sloane was
12 paid the same amount every week, including the pay letter he
13 received that says he is guaranteed to be paid seven days a
14 week and the testimony from his supervisor and everyone else at
15 Gulf Interstate that says we pay inspectors like Mr. Sloane a
16 guaranteed salary.

17 So when the plaintiff tries to explain why
18 Mr. Sloane's claim is typical, they say, look, what typicality
19 is about is will a merits determination on the named
20 plaintiff's claim resolve the claims of the class. To use
21 their phrase, as goes the claim of the named plaintiffs, so go
22 the claims of the class. Well, that's what they argued in
23 Hughes, the exact same claim, until the named plaintiffs in
24 Hughes lost.

25 And now they have gone to Judge Sargus and said wait a

1 second; the fact that the named plaintiffs in Hughes lost on
2 the merits at summary judgment does not mean anything with
3 regard to the rest of the class. They say, The court's grant
4 of summary judgment against the named plaintiffs on grounds of
5 the salaried basis test does not answer even that question as
6 to the remainder of the class. The court's ruling focused on
7 the time and payroll records of Hughes and McDonald alone. The
8 court did not examine any of the time and payroll records of
9 the remaining 78 opt-in party plaintiffs."

10 If a merits determination at summary judgment as to
11 the named plaintiff does not determine whether everybody else
12 was paid a salary or a day rate, then those claims are not
13 typical of each other. There is no efficiency to be gained by
14 trying this as a class action.

15 The next element, commonality and predominance, which
16 as Your Honor knows, under Third Circuit authority, are
17 analyzed together.

18 They have argued that common issues will predominate
19 in this case, because they say pipeline inspectors were paid on
20 a day rate and not a salary basis. And so they say the common
21 question is, is there a written guarantee in the pay letters.
22 That's a common question, but it can't be answered without
23 looking at each individual pay letter to see whether there's a
24 guarantee or not.

25 As Your Honor saw, some letters have an express

1 written guarantee and some do not. Even then, and as Judge
2 Sargus noted, the existence of the word guarantee does not flip
3 the switch from salary into day rate. With everything else
4 remaining exactly the same, the word guarantee, according to
5 Mr. Jones, changes from a violation of the law to no violation
6 of the law, with everything else exactly the same.

7 I submit to you that that is not what the FLSA meant
8 or was intended. It's not a 'gotcha' moment where an employer
9 forgets to use the word guarantee and their entire payroll
10 structure then becomes violative of the law.

11 As Judge Sargus looked at it, he said look, it's not
12 the written descriptors of the payment policies that are
13 relevant at the salary basis test inquiry. I'm focused on,
14 rather, the actual payment practice. I want to look at the
15 course of conduct.

16 We put a slide up earlier. Your Honor cited the Stein
17 v Guardsmark case. There are -- we put a Fifth and a Seventh
18 Circuit case up on the slide earlier. Other courts, likewise,
19 in the context, albeit the fluctuating work week analysis, to
20 the course of conduct of the parties to infer, is there a
21 salary or not. And there is no reason that you can -- you
22 could not infer that here in the salaried basis, section
23 541.604 argument or analysis, where you could clearly infer it
24 under the fluctuating work week. It's exactly the same
25 inference from the course of conduct.

1 Judge Fischer, when she transferred the case here, she
2 made note of the evidence that had been submitted to her at
3 that point on conditional certification and the plaintiff's
4 motion for Rule 23 class certification.

5 She noted that Gulf's pay records indicate that Sloane
6 was paid the full gross amount of 2,702 for every week of his
7 employment and that his gross pay did not meaningfully change
8 before and after that guaranteed pay letter.

9 So if a guaranteed pay letter comes out and it says
10 you are guaranteed to be paid seven days a week, and the
11 testimony has been we've always guaranteed it, this is exactly
12 what you would expect to see.

13 Their argument -- and Mr. Jones called it a
14 reclassification letter. That's not what it was. We didn't
15 change anything by sending out the June 2014 pay letter to Mr.
16 Sloane. We simply confirmed what Mr. Jones and his law firm
17 had been misinterpreting as a day rate. They came in and said
18 your letter doesn't say the word guarantee. We said well,
19 fine, we've been paying a guarantee. So if you want us to
20 write it down, we will.

21 As Judge Fischer noted, that didn't change a thing in
22 terms of how Gulf paid its inspectors. It has always paid a
23 guarantee.

24 Ms. Idalski noted upfront, guarantees do not have to
25 be written down. There is no case law that says the presence

1 of a written word guarantee versus its absence makes a
2 night-and-day difference in terms of the violation of FLSA.
3 And as Ms. Idalski went through the Rodgers case, the one
4 District of Idaho opinion that they cited does not hold that.

5 Instead, that case, the written agreement expressly
6 said that they were paid hourly. It wasn't the absence of a
7 written guarantee. It was the presence of a written contract
8 saying they were paid hourly. The case does not stand for the
9 requirement of a written guarantee.

10 So these pay letters and this argument that there is
11 common evidence from the pay letters because they don't contain
12 a written guarantee is a red herring, because the pay letters
13 are not what matters. It's the payroll records and the actual
14 course of conduct which the Court can only determine through an
15 individualized inquiry; just like we've gone through with
16 Mr. Sloane, looking at each day of his work and his entire
17 payroll records and deciding was he paid a salary or was he
18 paid a day rate. To try this as a class action, we would have
19 to go through this analysis with every inspector in an entirely
20 separate mini-trial.

21 Judge Fischer picked right up on this. "The level of
22 compensation for each inspector is determined on an individual
23 basis, after discussions between company executives and members
24 of the human resources department. There are no written
25 compensation policies detailing an inspector pay scale.

1 Rather, we have pay letters that set forth the general terms."

2 Mr. Jones argued about well, I would expect to see
3 something written to payroll telling them how to pay these
4 inspectors. Why, when Mr. Groves, who's the chief inspector on
5 the project, knows how the inspectors on his project are paid,
6 and he's the one approving the time sheets and he's the one
7 making sure time sheets reflect the guarantees before they are
8 submitted to payroll? Why would you expect there to be some
9 written memorandum to payroll explaining how the project works?

10 And again, Mr. Jones's suggestion that Ms. Kramer must
11 be some sort of savant to remember all of these different pay
12 structures. Well, no. At any given time, there are maybe ten
13 or 12 projects going on. And of those ten or 12 projects,
14 several of them will be with the primary, say, four or five
15 clients for Gulf. So Ms. Kramer will know that if she sees a
16 Kinder Morgan project, Kinder Morgan projects are paid to
17 inspectors on a seven-day guarantee. If she sees a MarkWest
18 project, she knows it's paid on a five-day guarantee. This is
19 not that complicated. It's not something that would require a
20 detailed, written manual to explain on every single project
21 what the written guarantee is between the inspectors on site,
22 who clearly know their guarantee for their project, and the
23 limited number of projects going on at the time. There is no
24 inference that some missing evidence is somehow evidence of the
25 lack of a guarantee.

1 We already showed you the pay letters and how they are
2 not common across the class. The two that were relied on at
3 conditional certification are perfect evidence. A day worked
4 and a calendar day are materially different for these purposes,
5 because whether you work or not, a calendar day comes and goes.

6 Mr. Sprick testified in his declaration and there is
7 no evidence to the contrary. There is argument from Mr. Jones
8 about what as approved by the client means. But there's not a
9 scrap of evidence to the contrary that as approved by the
10 client means that the client gets involved in the day-to-day
11 approval of pay for any given day for any given inspector.

12 So what you have in this argument about predominance
13 and common evidence is first they argue about pay letters, but
14 the pay letters are not what is legally determinative here. We
15 look to the payroll and the course of the party's conduct.
16 Even if the pay letters mattered, they are not common across
17 the class. There is not even a way to break them up into
18 subclasses, that you have so many different kinds of pay
19 letters for each individual project, and each inspector might
20 work on six or seven different projects.

21 You saw Mr. Hinkle himself had six different pay
22 letters. And you would have to go to each pay letter and each
23 project and look at the payroll and then decide was this
24 inspector paid a salary or not. And that would defeat the
25 purpose of class action.

1 Other than the pay letters that they have focused on,
2 there is no other common evidence of a day rate. You could
3 look to payroll, but that's not common evidence. That's
4 individual to each inspector. You could look at time sheets.
5 Again, individual to each inspector. And even more, Sloane's
6 own payroll and time sheets do not support their argument. You
7 could look to supervisor testimony, but the supervisor
8 testimony is uniform that there has been a guaranteed salary.
9 You cannot bind together a class based on a fact that you deny
10 is true.

11 They have said the jury might disbelieve Ms. Kramer,
12 who said it's a guarantee. Well, if the jury disbelieves Ms.
13 Kramer, it doesn't mean that they will necessarily find that
14 everybody was treated the same. That's what they have to
15 prove; that everybody was the same and they were all receiving
16 a day rate.

17 If the jury disbelieves Ms. Kramer's testimony that
18 everyone got a guarantee, they might find that people were
19 treated differently. So they still have the burden to show
20 that everybody was treated the same, and they were treated the
21 same in the way they claim that everybody was treated. And
22 they can't do it by just saying the jury might not believe Ms.
23 Kramer.

24 And again, I don't know how you're going to get around
25 Sloane's own testimony, he admitted in his deposition that he

1 didn't work on July 5th. It wasn't a holiday. There is no
2 testimony that holidays were paid on this project. None at
3 all.

4 There's then Mr. Sloane's own e-mail admitting I had
5 days off. Sundays were my regularly-scheduled days off. And
6 Mr. Groves's declaration says the same thing; there were lots
7 of Sundays when we didn't work at the job site. So if he gets
8 paid for all those days when he's not working, including the
9 one he specifically admitted to, July 5th, there cannot be this
10 common evidence and common policy they insist exists.

11 The only common evidence is evidence of a guaranteed
12 salary. Ms. Kramer, Mr. Sprick, Mr. Neuberger, Mr. Groves and
13 even the 2014 pay letters, they all say that there's a
14 guaranteed salary being paid. And there is nothing illegal
15 about that. You cannot bind a class together with a fact that
16 you deny is true.

17 What they are trying to say is that the fact that
18 everybody uniformly testified to a guaranteed salary somehow
19 binds this class that denies there ever was a guaranteed
20 salary.

21 So at the end of the day what you are faced with, Your
22 Honor, is either there's a common practice, and it's lawful,
23 it's paying a salary, or there is no common practice at all.
24 It's one or the other. And either way there is no -- there is
25 no way to certify a class when the class claims that they were

1 all paid a uniform day rate. Either they all were paid a
2 salary, which is what the evidence shows, or there's no
3 evidence of a common practice at all.

4 That's what the plaintiffs have offered you, no
5 evidence but lots of allegations.

6 Again, in Hughes, they followed the same tact they are
7 following here. They originally argued that everybody was paid
8 exactly the same way. That's the argument they're making to
9 you right now, Judge, everybody was paid the same way. They
10 all get a day rate. But then they lost on summary judgment
11 with Mr. Hughes and Mr. McDonald.

12 And Judge Sargus rejected that argument and said no,
13 at least Mr. Hughes and Mr. McDonald were paid a salary. So if
14 everybody is paid the same way, and we know that Mr. Hughes and
15 Mr. McDonald were paid a salary, then the natural conclusion is
16 that everybody was paid a salary. And there is no point in
17 certifying this class.

18 Recognizing that, the plaintiffs in Hughes said wait
19 a second. No, everybody was paid differently. Nobody was paid
20 like Mr. Hughes and Mr. McDonald. Their claims do not
21 determine what happens to the rest of the class. Well, that's
22 fine. But if a ruling on the merits of the named plaintiffs'
23 claims do not resolve the claims of the class, then why are we
24 going forward with a class action? Either way certification
25 should be denied.

1 Next you come to job duties. There is no common proof
2 of job duties. Individual issues related to job duties will
3 predominate here. On class certification they gave you seven
4 declarations. Seeking to certify a class of Pennsylvania
5 inspectors they gave you seven declarations, five of which were
6 from individuals who never worked in Pennsylvania. So those
7 can be just set aside from the outset because they don't have
8 anything to do with a Pennsylvania class.

9 The last two declarations; one is from Mr. Sloane, and
10 one from an opt-in, Mr. Bish, who is also part of the Ohio
11 case, Mr. Sloane says as a welding inspector, my primary job
12 duties included visually inspecting and observing welding work
13 on pipelines. Okay. That's testimony about what he did. That
14 doesn't tell us or tell the Court or carry a burden of proving
15 that common evidence will answer the job duties question for
16 everybody else in their class.

17 Mr. Bish says all utility inspectors on any particular
18 project visually inspect pipelines. That's so vague as to be
19 unhelpful, much like the FLSA's definition of an employee.
20 Anyone who is employed by an employer. It's essentially
21 circular. Utility inspectors inspect pipelines.

22 That tells the Court nothing about what these guy do
23 on a day-to-day basis, and it certainly doesn't carry a burden
24 of proving, by a preponderance of the evidence, that common
25 evidence will answer the job duties question under the two

1 Pennsylvania exemptions for every member of the class in one
2 fell swoop.

3 And that's because the evidence actually is
4 individualized. And we have submitted the declarations that
5 show this. When inspectors work on a pipeline, they are going
6 across miles of terrain that could be spread out over hill and
7 dale, if they're in West Virginia; they could be spread out
8 over the great plains, if they're in Texas; these projects are,
9 by nature, geographically spread out, and it spreads people
10 away from each other and keeps them separated during the day.

11 Welding inspectors at a pipeline are just connecting
12 one section of pipeline to another. It gets welded in a
13 circle. They coat the thing. It gets put in the ground. They
14 move on to the next one. It's the same thing over and over.

15 In a compressor station, a natural gas compressor
16 station where Mr. Sloane worked, he had to deal with many more
17 kinds of welds, many different kinds of welders, some pipe,
18 some structural steel. He had lots of different welding
19 procedures to apply. It's a far more complicated and technical
20 job than a welding inspector on a pipeline project.

21 Utility inspectors on a pipeline project, they might
22 be doing things like soil compaction testing, making sure that
23 the soil is not going to be loose once the pipeline is laid in
24 the ground. A utility inspector on a compressor station
25 wouldn't be doing that at all, because they aren't laying any

1 pipeline in the ground. They're building a compressor. They,
2 instead, would be doing things like inspecting concrete
3 pourings, reviewing structural issues.

4 Like with coding inspectors, they do different things
5 on pipelines and compressor stations. It matters what kind of
6 project these guys are working on, and that's an individualized
7 inquiry.

8 Project to project, supervisor to supervisor, it
9 changes job duties. As our declarations say, the degree of
10 discretion depends, in part, on the project to which they are
11 inside. Some clients keep a very tight reign on inspectors.
12 Some are more hands off. That's directly relevant to the
13 question of do they show discretion and independent judgment,
14 how closely they have been supervised. And if that changes
15 project to project, then the differences amongst the projects
16 matter, and common proof will not resolve these questions for
17 everyone in one fell swoop.

18 So at the end of the day, job duties are simply not
19 susceptible of common proof.

20 But plaintiff does an interesting thing in their
21 reply brief, they cite to a declaration that we had submitted,
22 and they say well, job duties can be proven with common
23 evidence.

24 Look at Robert Tate's declaration. He says, quote,
25 Based on my experience, chief inspectors are generally" -- and

1 then they tail off. They end the quote. What they left off
2 was -- "generally responsible for supervising other inspectors
3 on a given project, although the number and types of inspectors
4 that they supervise as well as the extent of day-to-day
5 supervision varies depending on the client, the project and the
6 personal style of each inspector."

7 Mr. Tate didn't say anything of the sort, that common
8 proof can work across all projects for all inspectors. He, to
9 the contrary, said it's different. We need to look at each
10 inspector individually, and each inspector on each project
11 individually to determine what they are doing.

12 Judge Sargus, again, recognized this, as other courts
13 have. When we are talking about job duties, the applicability
14 of these fact-specific inquiries requires the Court to get into
15 the weeds for each individual person. And because Judge Sargus
16 recognized that, he denied Rule 23 certification.

17 Other courts have done the same thing. They recognize
18 that job duties are inherently individualized and are not --
19 absent unusual circumstances, for example, a defendant who has
20 a written job description; for example -- Wendy's, for example.
21 They have a written job description for an assistant manager,
22 and they admit that everybody at every store does exactly the
23 same thing. In that case job duties may be susceptible of
24 common proof. You might be able to look at that job
25 description. There is no such proof here.

1 This case is far more like the Morgan Stanley case we
2 cited, like the Tahir case that says look, determining whether
3 an employee is exempt is a fact-intensive inquiry, and
4 acknowledging that reality, a number of courts have declined to
5 certify proposed classes in misclassification cases.

6 Or as The District of New Jersey held in 2011,
7 "Proving liability for the alleged FLSA violation devolves into
8 a mini-trial for each class member, requiring individualized
9 examination of each employee's duties, according to the
10 multi-factorial tests of what properly constitutes work in a
11 bona fide executive or administrative capacity."

12 That's what would be facing this Court, were it to
13 certify plaintiff's proposed Pennsylvania class; a series of
14 146 mini-trials, asking each individual on each project that
15 they worked on in Pennsylvania what they did under all the
16 factors of the Pennsylvania exception analysis.

17 THE COURT: Why doesn't the Ohio action, the Hughes
18 action, foreclose some of the issues of the claims here in
19 Sloane?

20 MR. HALL: We believe that it does, Your Honor. That
21 the ruling that Mr. Hughes and Mr. McDonald were paid a salary,
22 that ruling on summary judgment by Judge Sargus disproves the
23 fundamental basis of their class argument and of their
24 conditional certification argument, which is everybody was
25 treated the same, they were all paid a day rate.

1 That cannot possibly be true if we have Judge Sargus
2 saying no, Mr. Hughes and Mr. McDonald were paid a salary. So
3 it does foreclose the group nature of an action here.

4 THE COURT: Is it an example of issue preclusion?

5 MR. HALL: I don't believe that it needs to go that
6 far, Your Honor, that you would need to import that analysis.
7 Instead it's -- rather than precluding them from litigating the
8 issue because it's been resolved in another case, what I would
9 say is it's disproof of the fundamental basis of their
10 argument, that they should not -- they cannot say everyone is
11 the same. They were all paid a day rate if Judge Sargus has
12 already said no, these two guys were not.

13 THE COURT: If I were to deny certification in this
14 matter in Sloane, what would prevent the filing of a suit in
15 one of the federal district courts in, say, West Virginia?

16 MR. HALL: From one of the opt-ins, Your Honor?

17 THE COURT: Yes.

18 MR. HALL: Nothing, other than potentially the statute
19 of limitations. That -- we recognize that denial of
20 certification could lead to other onesies and twosies. But the
21 possibility or the impossibility of efficiently proceeding on a
22 group basis with a class like this is such that there really is
23 no other choice.

24 The last element of Rule 23, and this is 23(a)(4) that
25 is at issue here, is Mr. Sloane's adequacy as a class

1 representative. He is subject to unique defenses that threaten
2 to hijack this litigation and distract Mr. Sloane to the
3 detriment of the class. He has an extensive criminal history.
4 He has admitted to lying on his resumé, and he has told two
5 completely and inconsistent stories about what he was doing on
6 July 5th, an issue that goes to the very heart of the matter in
7 this case, which is when did he work and when didn't he.

8 As Your Honor pointed out under 609(a), criminal
9 history can be used to attack truthfulness. Again, these are
10 not unrelated, sort of juvenile offenses of DUIs from 15 years
11 ago. These are convictions for crimes of dishonesty, including
12 forgery.

13 But we understand we made that argument to Judge
14 Fischer on a motion to dismiss. She denied it. We still think
15 it's relevant to Mr. Sloane's adequacy at this stage.

16 More important to the adequacy is Mr. Sloane's
17 admission that he's not truthful in his ongoing activities, in
18 his daily life. He admits he lied on his resumé by suggesting
19 he was working for a prior employer from 2010 through 2012,
20 omitting the time that he spent in custody. What he did is he
21 told a bunch of potential employers, each one of them, that he
22 was working somewhere else during the 18 months that he was
23 actually in jail.

24 And when I deposed him and I asked him well, if it's
25 true that you were in jail, and you would have -- and he was

1 telling me that I would have told anybody who asked me that I
2 was in jail. I said well, if you would have told them the
3 truth, why not just put it in writing. His answer was well,
4 because it takes effort and time, and I'm pretty busy most of
5 the time. He couldn't be bothered to tell the truth.

6 That is very important evidence to a class
7 representative who has fiduciary responsibilities to all of
8 these absent class members, whose claims will, if certified, be
9 barred by the outcome of Mr. Sloane's litigation.

10 The Court has an obligation to these absent class
11 members to ensure that their interests are not unfairly
12 prejudiced by being tied to Mr. Sloane's fate, when
13 Mr. Sloane's fate is subject to these unique defenses.

14 Again, we showed you this earlier, Your Honor, so I
15 won't belabor the point. But you know, it could not get --
16 Mr. Jones said, you know, issues that don't go to the central
17 heart of the matter should not prevent a class representative
18 on adequacy grounds.

19 It doesn't get more central to an overtime case than
20 when did you work and when did you not work. And he told two
21 completely different stories, both of them under oath in
22 deposition. That kind of inconsistency, where one of them has
23 to be false, should undermine his adequacy.

24 So at the end, what we would ask, Your Honor, is that
25 you deny plaintiff's Rule 23 motion for class certification.

1 Mr. Sloane's claims are not typical. He was paid a salary.
2 They claim to have been paid a day rate. There is no common
3 proof that can resolve the questions of both salary and job
4 duties for all class members at once.

5 In fact, the only common evidence proves that Gulf has
6 been acting lawfully this entire time.

7 And Mr. Sloane, at the end of the day, is not an
8 adequate class representative. He has a pattern of dishonesty
9 that will distract from the -- from his prosecution of the
10 class's claims, to the detriment of the absent class members.

11 Likewise, the motion to facilitate notice should also
12 be denied. There is simply too much evidence in this case for
13 Your Honor to certify -- to even certify conditionally and send
14 out notice to 2,000 inspectors nationwide inviting them to sue
15 Gulf on a day rate theory, when Mr. Sloane himself has been
16 conclusively proven to have been paid a salary.

17 And I can say conclusively proven, because although
18 you don't make a merits determination at this stage, you cannot
19 say day rate if he was paid on a day he did not work. We have
20 it in his own hand, July 5th, 2014.

21 Again, Sloane has simply not carried his burden at
22 this advanced stage, with all of this discovery, of showing
23 that he is similarly situated to this entire nationwide class
24 of ten different job titles and 2,000 inspectors working for
25 all of these different supervisors, clients, projects in

1 different states with all kinds of different pay letters and
2 all kinds of individual payroll issues. He hasn't shown that
3 he is similarly situated to all of them, so he should not be
4 allowed to invite all of them to join this lawsuit.

5 I thank Your Honor for your time. I would be happy to
6 answer any questions you have.

7 THE COURT: No. You did a good job. Thank you.

8 All right. This has been a productive oral argument,
9 I think, for me, as oral arguments tend to be. I am busy, as
10 you would expect. And it's going to take me a little while --
11 I'm going to take this matter under advisement. It's going to
12 take me a little while to sort through this. Don't expect
13 anything before the first of the year realistically and
14 probably well into January, I would guess, at the rate that I'm
15 going.

16 But we'll get to it in fairly short order because when
17 I have an oral argument, that helps to -- it helps me
18 consolidate the ideas in my own mind, and I try to act with
19 reasonable alacrity in making my ruling.

20 Again, thank you very much. This was a helpful oral
21 argument entirely today.

22 I wish you safe travels and a happy Thanksgiving.

23 MS. IDALSKI: Thank you, Your Honor.

24 MR. JONES: Thank you, Your Honor.

25 MR. HALL: Thank you, Your Honor.

1 MS. SALTZ: Thank you, Your Honor.

2 THE COURT: The Court will rise.

3 (4:49 p.m., court adjourned.)
